CITY OF QUINCY

MASSACHUSETTS

CITY GOVERNMENT OF 1927

TOGETHER WITH THE
ANNUAL REPORTS
OF THE OFFICIALS FOR THE YEAR

1926

CITY DOCUMENT NO. 38

BOSTON
E. L. GRIMES PRINTING CO.
368 CONGRESS STREET

INAUGURAL ADDRESS OF MAYOR THOMAS J. McGRATH,
HIGH SCHOOL HALL, MONDAY, JANUARY 2, 1927

Gentlemen of the Council:

Owing to the unusual situation in which we were placed this year by the adoption of the primary law and the delayed election, it was impossible to make either a critical or exhaustive study of the economic or financial condition of the city. Later, however, I propose to get all this information in a concise form for our mutual benefit and guidance. It is apparent, of course, that our policy this year must of necessity be somewhat different from other years, due to the fact that in the last two years extraordinary expenditures have been authorized for many public improvements.

Our large constructive program is nearly complete and for a time, at least, we can feel that no exceptional outlays will be required either in the school or any other department of the city.

In a growing city, however, there are always demands made for improvements, and 1927 will prove no exception to the usual experiences of the Mayors and City Councils for the past thirty-eight years. On all sides there is the insistent call that the outlying sections of the city be given necessary facilities, and it is to these localities that we should give our first thought and consideration. All these sections have been developing rapidly and it is no longer fair that they should be denied a share in public expenditure.

Before proceeding to outline our work for the year I should like to call the attention of the members of the council to a matter in which some of us have a deep interest. I refer to the budget system in making expenditures through loans. My predecessor, Mayor Barbour, was committed to this policy, but for reason or reasons this plan did not receive the approval of the council. I now renew the request that the plan of preparing the whole year's work be undertaken now and that no appropriation for loans be made until the whole matter of these capital expenditures be given consideration. As the city finds the budget system essential in expenditures made from tax levy, so I believe we should decide that these other expenditures, which are in reality only deferred current expenditures, be made with the same care and foresight as is now applied to the making of the yearly budget.

To carry my meaning to a direct application, let me state the fact that on January 1, 1927, the city has a credit balance of \$398,100. This sum is available for streets, sidewalks, sewers and new buildings. If we should have an extraordinary expenditure early this year, this balance would be hardly adequate to meet the issue, and we should be compelled to postpone this outlay until such time as the monthly payments on our authorized debt should give us the required amount to meet an exceptional expenditure. As most of the retiring debt becomes due in the last half of the year it becomes evident that this credit of \$398,100 would not become useful until midsummer at least. I have not had time to get the whole information from the City Auditor relative to the 1927 maturities, so must content myself with a general statement of just what the January 1, 1927, credit and possible additions

during the first six months mean to the Mayor and Council at the beginning of this year.

This means, first of all, that the available credit should be considered with other factors. First, and this I think is the most important factor, the Council should bear in mind that our net debt January 1, 1926, was \$5,078,000, and to add to this sum in greater proportion than we decrease it would not be just to the taxpayer. Again we must bear in mind that the capital expenditures made in 1926 require their first pro rata payment this year, and as this is a very considerable increase over last year I must strongly emphasize the necessity of holding down current and capital expenditures to the very lowest amount. All expenditures outside the outlay of the water department must be kept within the debt limit. Last year the authorization outside the limit was \$2,184,500 or 43 per cent plus of the total net debt. I am deeply sensible of the differing points of view concerning these expenditures, but now that they have been made prudence compels us to interpose a strong veto on any contemplated large increase in debt.

In bringing this matter to the attention of the members of the Council I have in view a matter that probably may come to you during the year. With the addition of the school buildings to the school system it might be supposed that our school needs are taken care of for some years. I am, however, of the opinion that the demand for additional schoolroom will be heard this year, and if the School Committee should decide that a new building is needed in the rapidly growing Adams Shore, Merrymount and German-town districts, the Council would be called upon to give serious consideration to these requests. It has been obvious for some time that these districts would require adequate school facilities, and if the decision in their favor should be made this year the credit balance of \$381,000 would be the first available source of this expenditure.

This brings us back to our first premises, the necessity of a budget plan in capital expenditures. I shall endeavor to ascertain the opinion of the School Committee at an early date, so that we may know definitely the school requirements for 1927. With this matter settled the Mayor and Council can proceed to clearly and intelligently outline the work to be done in other directions.

The year 1927 will be a usual year in the experience of the city government. Demands will be made for improvements; in all cases these demands will be based on actual needs. But at the outset of the year we are confronted with an unusual situation. Large expenditures were authorized last year to be charged to the budget of 1927 and to make provisions to meet these obligations and still not increase the taxpayer's burden is the extraordinarily difficult problem which we have to meet. While I have not the actual figures at hand of the total increase so far authorized in the year's budget, I am conscious of the necessity of raising at least \$13,000,000 of new value to meet these increases. Ordinarily we might use some of the new increase in wealth to help keep the tax rate down or else use a portion of it for new work. This year every dollar that can be realized from new assessments must be used to defray the increased costs in all departments. It may be that the new wealth will be quite insufficient to cover the additional costs and the balance will have to come through economies and a possible increase in receipts. The whole situation demands the most careful thought and management, and I sincerely hope that

the members of the Council, realizing to the full the seriousness of the problem, will do their utmost to help in the solution of the problem.

The Public Works Department

This department is the most important one under the direct control of the Mayor. Its work has grown enormously in the last decade, and to meet present requirements its organization should be so efficient that every demand shall be reasonably met. The head of this department needs the cooperation of the entire city government and of citizens generally and in my quest for an executive capable of handling the responsibilities of the post, I have always had in mind the hope that I might find one who thoroughly understood the demands of the community and who would also be sympathetic with my own view relative to general policies to be pursued. I sincerely trust that my efforts to find such an executive have been successful and all I now ask is that every one give him and his assistants the fullest measure of cooperation. It is an extremely difficult place to fill to the satisfaction of every one, but now that the choice has been made let us work untiringly to achieve actual results.

The Assessing Department

In making a selection of this important board I have endeavored to find three men who were representatives of three widely differing points of view. I deemed it essential to the proper balance of the board that this should be so, since to choose three men of identical viewpoints would tend to accentuate either present policies or other policies which might be equally unsatisfactory.

I do not contemplate an inharmonious board. Rather do I hope that the membership of the new board will bring to their tasks the fruit of long experience in assessing values, a wide knowledge of the city, and last, but by no means the least consideration, a strong feeling that any further increases in property must be substantially supported by undisputed facts. While the board is by law entirely free of any influence issuing from the Mayor's office or from any other source, it has been my pleasure to name three men who have a sympathetic understanding of the conditions of the people of Quincy. Wherever adjustments in present values are justified I am quite certain that the petition of any citizen will receive courteous and helpful consideration. Wherever inequalities are found I hope that the adjustment will be made to the entire satisfaction of every one.

Water and Sewer Department

These important services are under the jurisdiction of the Commissioner of Public Works and at present are very capably managed. Extensions in the water department are not likely to prove very heavy this year, in view of the extraordinary expenditures made last year. In a matter of water extensions this year I shall make no recommendations until the Commissioner of Public Works has had an opportunity to familiarize himself with the system. It is to be presumed that there will be some call to supply new territory, but the extent of this demand will probably not be large.

Drainage

A new drainage plan is being prepared for the city, and upon its completion the whole subject will be referred to the City Council. The problem of drainage is always an acute one in a city with the topography of Quincy, and while considerable sums have been spent on drainage there are still many sections of the city where the need for drainage is keenly felt. I am opposed to the idea of borrowing extensively for drainage purposes. There may be occasions where a loan may be justified—the case of trunk line drainage may be such an instance—but in the majority of cases drainage problems should be financed through the budget.

New Streets

Under the law if a city borrows money for street purposes the work must be done under conditions laid down by the Massachusetts Highway Commission. These conditions mean an exceptionally costly roadway and entirely thwart either hope or possibility that a city of Quincy's area can ever expect to catch up with the demands for new streets. For years there has been a feeling in the City Council, supported by the chief executives, that the so-called minor streets could be built at a much less cost than the heavy rock road insisted upon by the Highway Commission when loans are made. Cheaper roads can be built if we are prepared to do the work out of tax money. Here is the actual stumbling block—the fear to undertake this work in any considerable amount because of a reluctance to add to the budget. This obstacle is very real the present year and I regret to state that at this moment there is little encouragement that we will be able to immediately put into practice a long cherished and long deferred plan to accept and build minor streets out of current funds. Further study of our finances may perhaps reveal a way to overcome this obstacle. I am reminded that under the statute regulating municipal indebtedness municipalities are required to put 25 cents for each thousand of valuation into the budget before negotiating loans within the debt limit. Our net valuation for 1926 was \$121,241,068, and on the basis of this valuation the 25 cents per thousand requirement would give us \$30,310.26. This amount will have to be included in the budget for every loan made within the debt limit. If it should be the policy of the City Council to concentrate on one phase of public improvements, namely, the extension of street acceptance, it might be found feasible after the budget is made up to allot the total amount that might in reason be spent on all items to the work to be done on one account. In other words the council this year might take up the matter of street work to the exclusion of all other work and thus make possible considerable work in this one direction. All this is, of course, held out as a tentative policy. Its fulfilment depends on the other factors which are elsewhere slightly noted in this statement and also in the careful study of the budget and deductions therefrom, which will be made within a period of six weeks. If I may be pardoned a word of suggestion to the members of the City Council at this time, it is that in all that is done this year the financial situation be always kept in mind. I am as earnest as any one in trying to meet the needs so apparent on every side, but in the final thought I must not lose sight of the problem of meeting the budget

requirements without increasing either the tax rate or the assessments. With the immense amount of new value necessary to solve the problem of meeting our 1927 increase in the budget, it becomes a very insistent duty with the city government to so regulate the expenditures of this year that we can jointly keep the machinery of government moving at the highest point of efficiency and not increase the cost to the people of Quincy. This is at least my problem and in solving it I ask for the earnest cooperation of the members of the City Council. From information given by the City Auditor but not yet available as a complete statement a substantial balance will be left from the street appropriations of last year. This balance should in justice be used for other street work, and if it is expedient to use it in this way, I will be pleased to help the Council in allotting it to some urgent street construction.

School Department

The school budget for 1927 will probably reach the million dollar mark, an appreciable increase over 1926. With the North Junior High in operation in February the need of additional teachers and supplies will be the biggest factor in the school budget increase. The South Junior High on Granite Street will probably be ready in September, and for this building the School Committee will have to make provisions for the last four months of the year. My hope is that the school budget will not pass the million dollar figure.

As was stated elsewhere there is a possibility that our school building program is not complete. The North and South and West districts will be fully served by the new buildings, but other sections with a growing school population will probably require new structures. While it may not be good policy to anticipate any large building expenditure, it still seems only reasonable to keep in mind the needs of these sections and to be prepared for a call to meet it.

The Parking Problem in City Square

For many years the City Government has been awake to the necessity of doing something to relieve the congestion in City Square. Many plans have been submitted, and, while all have certain marked points of similarity, all have likewise the disadvantage of being expensive projects. While a member of the City Council I have always felt that the city was unable to bear the financial burden of any of these major plans. I am still of the opinion, with some reservations. The necessity of some action has now become acute, and I now believe that one of the first duties of the New Year will be to call a conference of the Council and the Chamber of Commerce and all those who have an interest in this matter to consider practicable means to relieve the congestion. The city is unfortunate in not having a sizable tract of land near the shopping district for the parking of cars, but in lieu of this facility we must look elsewhere for relief. If we were financially able the problem would not be so insuperable. The financial aspect, however, must be considered as one of the vital considerations of the relief plan. Without in any sense withdrawing from my consistent policy of opposing expensive schemes of

relief, I am firmly convinced that the situation calls for immediate and earnest study.

The Budget

Since the adoption of the budget system there has been a steady growth of interest in its beneficent results. The system has not reached the fullness of maturity and I hope this year we may come to a point where the original estimates will cover the whole year. It will make the work of the Council easier and relieve the Mayor of much needless work if department heads are expected to base their estimates for the full twelve months.

There will be exceptional circumstances arising from time to time which could not be foreseen earlier in the year, but for the generality of cases estimates should be so accurately made in March that supplementary budgets would not be needed in the last quarter of the year.

Financial Statement

Appended to this statement is a financial résumé by the City Auditor. This financial review is only a partial outline of financial operations during 1926, but I hope in the next few weeks to have a much more extended statement prepared showing the maturing debt by months, the temporary loans account, the statement of the tax collector, the per capita cost of government, the per capita debt statement and all other matters which shall be of assistance in explaining the financial condition of the city. It shall be my purpose to get the budget in form as soon as possible, so that at the outset and before new liabilities are considered we will have an understandable exposition of our finances.

Comfort Station

While I am reluctant to advocate any undertaking which may entail additional outlay, I am convinced that this long delayed station should be built and equipped for the benefit of the people of our city and of those strangers who come here to trade. Many plans have been made and in the end discarded. New plans will be prepared and submitted to the Council. Our problem here is not so much the station itself as it is to find a desirable location. With the help of the Council and the interest of the public I am certain that some way may be found to provide this necessary improvement.

The Grade Crossing Delay

By a decree of the courts made originally in 1914 all grade crossings in this city were to be abolished. After 12 years nothing has been done except to build the overhead structure at Saville Street. This structure fails completely to satisfy the people who live on the west side of the track, and is moreover totally inadequate both in structure and in design for the purpose of which it was intended. The promise of the railroad authorities was that this overhead was simply a makeshift arrangement and was to be in operation only until the underground passage and the changes

at Quincy Station could be made. These permanent improvements have been delayed here and at Quincy Adams, the latter crossing being a particularly dangerous spot.

It has not heretofore been a matter in which a member of the Council could take any definite action, but I hope now that something may be done to carry out the decision of the court. If the railroad corporation can delay this matter indefinitely, then I believe the old plan, which was not wholly acceptable, should be discarded and a new plan worked out. The whole subject will be given earnest consideration and if possible some arrangement made for the benefit and safety of the people of the city.

A word in conclusion to the members of the City Council: I hope that our relations during the year will be pleasant and profitable. We have much work to do and undoubtedly we will have many trying hours. If, however, the general good will of the Council as I have known it prevails, I am sure that at the end of the year we will have the great satisfaction of realizing that our labor had been fruitful. We have been intrusted with the good name and well-being of the people of this city. Our appreciation of this trust will be amply demonstrated by the fidelity which we bring to their service.

It would be unfitting if I did not at this time say a word to the people of Quincy, who have entrusted me with the honorable duties of the Mayoralty. I asked for their suffrage upon the promise that I would endeavor to do certain specific things. One of these things was the insistence upon a measure of reasonable economy in the conduct of the affairs of the municipality and another was the pledge that service, both from me and from those who are working with me, should be given without stint. I am still mindful of these pledges, and if strength and will do not desert me—and I am not conscious of any lessening of these qualities—this compact with my fellow citizens will be kept. I ask their cordial cooperation in working out my plan for their benefit. Let me hope that they will be tolerant and indulgent until such time as I may bring my plans to fruition. I am deeply sensible and appreciative of the confidence put in me, and with my thanks for their confidence I ask for whole-hearted support in my undertaking.

The mandate of the people is so clear and emphatic that I am impelled by a sense of duty to restate the necessity of a prudent management of affairs, conserving every dollar and only spending when we are assured of an equivalent return.

In this preliminary statement to the Council of 1927, I have deemed it essential to include some financial statements bearing on the outlook for the present year. By these tables it is obvious that our resources are not large, and in consequence we must do our work with our financial possibilities always in mind.

City Debt for Year 1926

The total funded debt of the city January 1 was \$3,415,000. During the year this was reduced by payments as follows:

City debt within the limit	\$286,500 00
Sewer debt within the limit.....	54,000 00
Outside the debt limit:	
Sewer	26,000 00
Water	64,000 00
County Hospital	9,000 00

City hospital	11,000 00
High school land	3,000 00
High school building	56,000 00
Monatiquot bridge	12,000 00

Total	<u>\$521,500 00</u>
-------------	---------------------

The funded debt during the year has been increased as follows:

Within the debt limit:

Sewer	\$70,000 00
New streets	112,000 00
School building and furnishings	425,000 00
Fire building and apparatus	70,000 00
Granolithic walks	25,000 00
Hospital building	125,000 00

Outside the debt limit:

Water construction	660,000 00
South Junior High School	450,000 00
Government School	157,500 00
City Hospital	30,000 00
Surface drains	60,000 00

\$2,184,500 00

Summary

Funded debt, January 1, 1926.....	\$3,415,000 00
Bonds paid during the year.....	521,500 00
	<u>\$2,893,500 00</u>
Bonds issued during the year.....	<u>\$2,184,500 00</u>
Net debt	\$5,078,000 00
Increase funded debt	<u>\$1,663,000 00</u>

BORROWING MARGIN FOR 1927

"General Laws. Chapter 44, Section 70"

Except as otherwise authorized by law a city shall not authorize indebtedness to an amount exceeding two and one-half per cent on the average of the assessors' valuation of the taxable property for the three preceding years, the valuation being first reduced by the amount of all abatements allowed thereon, previous to December 31 of the preceding year.

Net valuation, 1924	\$92,250,170 00
Net valuation, 1925	107,640,817 00
Net valuation, 1926	<u>121,241,068 00</u>

\$321,132,055 00

Three years' average	107,044,018 00
----------------------------	----------------

Two and one-half per cent.....	2,676,100 00
--------------------------------	--------------

Debt January 1, 1927:

City	\$2,065,000 00
Sewer	273,000 00
	<u>2,278,000 00</u>

\$398,100 00

The funded debt of the city is as follows:

School building and furnishings	\$2,172,500 00
Water	862,000 00
Sewer	556,500 00
Streets	584,000 00
Hospital—City, buildings and equipment	417,000 00
Surface drains	177,000 00
Fire station and apparatus	106,000 00
Police station	90,000 00
Monatiquot bridge	40,000 00
Permanent sidewalks	35,000 00
Hospital—County	22,000 00
Cemetery land	12,000 00
Playgrounds	4,000 00
	<hr/>
	\$5,078,000 00

Bonds coming due, which increases borrowing margin in 1927:

	City	Sewer	Total
January	\$6,000 00	\$6,000 00
February	10,000 00	10,000 00
March
April	52,000 00	\$16,000 00	68,000 00
May	3,000 00	3,000 00
June	10,000 00	4,000 00	14,000 00
July	81,000 00	22,000 00	103,000 00
August	65,500 00	7,000 00	72,500 00
September	55,000 00	3,000 00	58,000 00
October	34,000 00	13,000 00	47,000 00
November	11,000 00	11,000 00
December	13,000 00	13,000 00
	<hr/>	<hr/>	<hr/>
	\$340,500 00	\$65,000 00	\$405,500 00

CITY GOVERNMENT — 1927

MAYOR, HON. THOMAS J. McGRATH
SECRETARY, WILLIAM C. CANNIFF, JR.

DEPARTMENT OFFICIALS

COMMISSIONER OF PUBLIC WORKS, FREDERICK E. TUPPER.
CITY TREASURER, HAROLD P. NEWELL.
CITY CLERK, EMERY L. CRANE.
ASSISTANT CITY CLERK, HATTIEMAY THOMAS.
COLLECTOR OF TAXES, HAROLD P. NEWELL (Temporary).
CITY SOLICITOR, JEREMIAH J. McANARNEY.
CHIEF OF POLICE, ERNEST H. BISHOP.
CHIEF ENGINEER OF FIRE DEPARTMENT, ALFRED L. MEAD.
COMMISSIONER OF PUBLIC WELFARE, CHANNING T. FURNALD.
CITY ENGINEER, PATRICK F. O'BRIEN.
CITY PHYSICIAN, RICHARD M. ASH, M. D.
INSPECTOR OF ANIMALS, EDWARD A. DEVARENNES.
SEALER OF WEIGHTS AND MEASURES, JAMES M. CANTFILL.
INSPECTOR OF BUILDINGS, WARREN S. PARKER.
INSPECTOR OF WIRES, ALEXANDER J. SOUDEN.
DOCK AND WATER FRONT COMMISSIONER, EDWARD M. WIGHT.

ADMINISTRATIVE BOARDS

Assessors

Meet every Monday and Thursday at 9 A. M.

MICHAEL T. SULLIVAN, CHAIRMAN
Term expires first Monday of February, 1928

ALBERT NELSON,
Term expires first Monday of February, 1929

COL. WARREN E. SWEETSER.....Term expires December 31, 1929
56 Elm Avenue

STURGIS H. HUNT.....Term expires December 31, 1929
119 Washington Street

Secretary of Board and Superintendent of Schools**JAMES N. MUIR**

The regular meetings of the School Committee are held at 8 o'clock P. M. on the last Tuesday of each month except July.

REPORT OF THE AUDITOR

QUINCY, MASS., April 1, 1927.

To the City Councillors, Quincy, Mass.

In accordance with the ordinance of the city, I submit the annual report of my department, showing in detail the receipts and expenditures of each department.

Also several statements showing the financial condition of the city at the close of the financial year, December 31, 1926.

HENRY O. FAIRBANKS,
City Auditor.

IN COUNCIL

Order No. 52

Appropriation Order

FEBRUARY 1, 1926.

Ordered:

That the several sums named herein be and are hereby appropriated for the payment of the expenses of the City of Quincy for the financial year beginning January 1, 1926, and ending December 31, 1926, to be expended by and under the direction of the several officers or boards as herein designated.

That the appropriation for Bonds, Interest, and Expenses of Water Department, be paid from Water Receipts.

CHARLES A. HADLOCK,
Collector of Taxes.

REPORT OF DEPARTMENT OF HEALTH

JANUARY 1, 1927.

To the Honorable Mayor and City Council.

GENTLEMEN:—Herewith I beg to submit the report of the Health Department for the past year. Appended are the various section reports which cover the variety of work done under this department and show conclusively a constructive advance in all lines of work.

The Well Baby Clinics were increased during the past year to cover each ward of the city, so that all sections might have the benefits that are to be had from this service. That this met with universal approval is shown by the attendance record. This work really has shown its value in the reduction of the death rate of babies under one year of age. The intent of this work is to aid the young mother in handling the very difficult problem of caring for the baby,—telling her what to do and how to do it. Very often the Clinic resolves itself into a veritable clearing house, directing the charges to their own family physician for correction or repair, whichever the case may be.

During the past year, in co-operation with the School Department, the work of Schicking the children of the schools was started and met with generous co-operation on the part of the parents throughout the city. It is to be regretted that more publicity as to this important phase of health work could not have been given before starting the actual work, but if followed up from year to year, it will, in time, become as much a part of the school preparation as the present vaccination requirement, and it is to be hoped that with the School Superintendent situation cleared up, this work may be carried on with the regularity it deserves, as each entering class begins.

The School Survey that is being urged by the State Department of Health has gained favor as it spreads, and is recommended by this department as of great importance in the constructive program of health work. Through the kind assistance of Rev. Fr. Owens a health survey was made of the Parochial School and its value easily demonstrated, showing what may be done by surveys of our other schools. It is really a study of underweight and backward children, discovering the cause and making recommendations for the improvement of that child, thereby creating an asset in health to the community, rather than allowing a liability to arise which is almost sure to happen, if the physical condition of the child is not carefully observed and corrected. In this work of survey, the assistance of the Norfolk County Hospital, the superintendent, Dr. Pillsbury, and the County Commissioners' co-operation were of great help to this department in carrying out the complete examination. While the assistance of these agencies may not be appreciated by the City Fathers and the public at large, I wish at this time to register our appreciation and thanks.

In the T. B. work, which is carried on under State requirement, we have found the co-operation at the Norfolk County Hospital wonderfully helpful, enabling us to do very extensive work along

this line. It has been our aim during the past year to seek out the Pre-Tubercular case, institute treatment and observation, that we may cut down the contact cases, thereby reducing the actual cases of T. B.

Reference to brooks and streams in Quincy, made in former reports, needs no further comment, other than that a survey of the same should be made with reference to covering, widening or clearing, so that people whose homes are in the drainage area would be relieved of wet cellars.

There should be a more mutual program of building construction, with especial reference to grade and consequent problems of drainage. It is a very serious health problem to find that building permits have been granted without care as to grades, with the result that potential citizens who have invested money in new homes find themselves confronted by cellars partially flooded at certain seasons of the year and no program of relief. With no insistence on the part of the Inspector of Buildings relative to the obtaining of grades, cellars are put in a haphazard manner, causing the buyer of the property needless expense in the low and poorly drained sections of the city. Much expense to the city could be saved in avoiding the nuisance which this condition causes and will cause if not taken care of.

I firmly believe, and this is strengthened by the universal findings of medical and health authorities, that all milk sold in the city should be sold only after pasteurization, to protect against milk borne diseases.

Our Nuisance Work is of undoubted value, a considerable part of which consists of mosquito elimination work, but in the tide water sections this is not very satisfactory.

The use of private dumps for filling purposes should be continued to save haulage, but the recipient must be made to keep those from becoming a menace or a nuisance. Public dumps should be so cared for that the papers and other materials which may be stirred by the wind shall be covered or otherwise kept from becoming a nuisance. It is hoped that the unsightly condition of Black's Creek may be improved with the construction of the new Southern Artery. At present this is a very sad appearing and obnoxious place.

The necessity of a well built and well kept Comfort Station is so apparent that longer delay in this matter should not be tolerated by the citizens. Early action by the council would, I feel certain, meet with approval.

In contagious diseases, the city has been very fortunate, the low average has been, of course, partially luck, but no small portion of credit for this condition should be given this department, for its vigilance in nipping in the bud a threatened epidemic of scarlet fever in the Adams School, which came shortly after the opening of the school year and was gaining a considerable headway, owing to the mildness of the disease, but, acting with the School Department, it was soon checked.

The department instituted a weekly report to the press which has given the public information of health conditions as they existed and in comparison with other years. This has been of interest to the physician as well as the layman.

During the year the position of Pre-Natal Nurse was created after the survey of our Health Department had been made by the American Public Health Assn. and recommended. Owing to sickness in another department, this work was slow in getting under

way, but once started, it has been accepted by the physicians of the city, who find this a very helpful way to keep in touch with their pre-natal cases. The nurse is prepared to take blood pressure readings and in other ways keeps tabs on this more or less hazardous condition of health. An attempt on the part of certain life insurance companies to break in on this work seems to be in progress, but it is to be hoped that we are intelligent enough to carry on our own task, and this, too, when the work has been so recently started. I see no reason why it should be given over to a company who are only interested from a business standpoint.

I am not unmindful of the help of the Quincy Woman's Club Visiting Nurse Committee and wish to thank them for their assistance in our work.

I wish to here thank one and all in our Health Department for their faithfulness and cooperation. The past year has been one of construction and inspiration, we have been cooperated with and complimented by the State Department of Health, and I believe no more efficient department exists anywhere in the state, and in very few cities of the country.

Respectfully submitted,

FRED A. BARTLETT, M.D.,
Health Commissioner.

REPORT OF SUPERINTENDENT

JANUARY 1, 1927.

DR. FRED A. BARTLETT, *Health Commissioner*.

DEAR SIR:—I hereby submit the annual report of the Department of Health for the year ending December 31, 1926.

The personnel of the department is as follows:

Commissioner of Health and Insp. of Milk.....	Dr. Fred A. Bartlett
Superintendent	Thomas G. Smith
Clerk	Verna M. Kelley
Sanitary inspector	A. A. Robertson
Assistant milk inspector	James O'Dowd
Plumbing inspector	J. J. Keniley
Inspector of meats and provisions.....	Howard O. Rogers
Dispensary physician	Dr. C. J. Lynch
Child welfare physician	Dr. E. B. Fitzgerald
Venereal disease physician	Dr. E. E. Smith
Bacteriologist	Dr. E. E. Smith
Tuberculosis nurse	Gert. T. Russell, R.N.
Contagious nurse	Cath. F. Coleman, R.N.
Child welfare nurse.....	Nettie D. Fowler, R.N.
Prenatal nurse	Mary E. Keeley, R.N.
Inspector of animals and slaughtering.....	Dr. E. A. DeVarenes

There has been in addition to the personnel of the department the past year, that of the appointment of Mary E. Keeley as prenatal nurse. She is a very efficient nurse and a great credit to this department.

I wish to extend my sincere thanks to the Health Commissioner and other members of the department for their efficient cooperation in all matters pertaining to the department. Appended you will find the report of the various inspectors and nurses, also my report of diseases and deaths reported for the year 1926.

See Auditor's report for receipts and payments.

Respectfully submitted,

THOMAS G. SMITH,
Superintendent.

REPORT OF SANITARY INSPECTOR

JANUARY 1, 1927.

DR. FRED A. BARTLETT, *Health Commissioner*.

Coal Dust Nuisance

During the summer we were in receipt of a number of complaints from the residents of Germantown that a nuisance was being caused by coal dust blowing through the air and floating in the water and which came from the Edgar Plant of the Edison Electric Illuminating Co. at North Weymouth. We notified the Edison Company,

and Mr. John Campbell, Superintendent of their Special Service Department, immediately suggested that our department join with them in making a complete investigation.

We found that the nuisance was caused when coal was being unloaded and when coal was being transferred from the field to the station. The coal was transferred from the boat to the field and from the field to the station by a series of conveyor belts system, the coal being loaded on the belts from large clam shell buckets, passing through hoppers. The coal going from one belt to another also passed through hoppers. It was found that practically all the dust that escaped did so at points where the coal was transferred from the bucket to the hopper, from the hopper to the belt and from the belt through a hopper on to another belt. The Edison Company immediately started work enclosing these various transfer points in so far as the mechanism would permit. Some further changes are contemplated and will be made as soon as possible. The officials of the company have shown a fine spirit of cooperation and are doing everything that is possible to eliminate this nuisance.

Pollution of Harbor

The pollution of the waters of Quincy still continues and many complaints were received during the summer season that under certain tidal and wind conditions the water was unfit for bathing purposes. The Engineering Division of the State Department of Public Health conducted an investigation during the summer months and will it is hoped suggest a method of eliminating this nuisance. A resolve was introduced into the last session of the legislature calling for an investigation of the advisability of extending the Metropolitan sewerage system to take in a number of towns in the Neponset River Valley. I appeared at one of the hearings on this matter, representing this department, and at our suggestion the resolve was passed to include an investigation of the outlet of the system in Quincy Bay.

Slaughtering House

During the early summer we received an application to issue a permit to a company desiring to occupy a certain building at Quincy Point as a slaughtering house and rendering plant. After an inspection of a similar plant operated by the same company in a neighboring city, it was decided that this department would not approve the application.

Respectfully submitted,

A. A. ROBERTSON,
Sanitary Inspector.

REPORT OF SANITARY INSPECTOR

JANUARY 1, 1927.

DR. FRED A. BARTLETT, *Health Commissioner*.

DEAR SIR:—Herewith is submitted my report of activities other than those as Sanitary Inspector for the year ending December 31, 1926.

Culture Materials

We maintained during the year culture stations at eight drug stores in different sections of the city where diphtheria anti-toxin, vaccine and various culture tubes could be secured by physicians.

A supply of serums was kept at the Dispensary and the culture tubes could also be secured at the Health Department office.

During the year 17 trips were made to the State Laboratory for supplies and 167 trips were made to the culture stations to replenish their supplies.

Requests were received from local physicians on 75 occasions for supplies not kept at culture stations and these were delivered direct to the office of the physician. Twelve trips were made to the Quincy City Hospital with supplies, and three trips were made to the Wasserman Laboratory for tubes.

The new serum for the treatment of scarlet fever was used for the first time during the year, and physicians who made use of this serum report that excellent results were received. In at least one case there is no question but that the anti-toxin was the means of saving the life of the patient.

This anti-toxin was supplied by the State Department of Public Health, but because of the limited supply we were unable to keep any on hand in Quincy, and whenever it was needed urgently it became necessary to make a trip to the anti-toxin laboratory. During the year 10 such trips were made.

A supply of scarlet fever for active immunization and Dick test outfits for determining susceptibility was kept at the dispensary and furnished to local physicians on request.

Serum for the treatment of rabies was secured in two cases during the year.

Mortality and Morbidity Reports and Charts

During the year there were kept morbidity charts for diphtheria, scarlet fever, measles and whooping cough. These charts showed the expectancy each week for the four diseases and also the number of cases each week in 1926.

Morbidity reports by wards were prepared each month, and these reports were consolidated at the end of year for the annual report.

A list of deaths showing the cause, sex, age and nativity was prepared each month and these were also consolidated at the end of the year for the annual report.

Newspaper Publicity and Talks

During the entire year a weekly report showing the report of communicable diseases and number of deaths were sent to the two local newspapers for publication. Special articles were also prepared on the baby clinics, system of milk inspection and other subjects, and these were published. During the year I spoke at three meetings to a total attendance of over 1,100.

Clinics

During the spring months I assisted at the Schick clinics which were conducted in the grammar schools and also at the weighing of the pupils of the St. John's School preliminary to the under-weight clinic.

Four meetings of the Association of Boards of Health were attended at one of which a new set of minimum quarantine regulations were recommended, and which this department has officially adopted.

Venereal Diseases

During the year 19 cases of venereal diseases were reported as follows:

	Males	Females	Total
Gonorrhea	12	2	14
Syphilis	2	3	5
Total	14	5	19

Notices of lapsed treatment	28
Returned to treatment	20
Failed to return to treatment unable to locate.....	8
Follow up letters	28
Follow up visits	12

Respectfully submitted,

A. A. ROBERTSON.

REPORT OF ASSISTANT MILK INSPECTOR

JANUARY 1, 1927.

DR. FRED A. BARTLETT, *Health Commissioner*.

DEAR SIR:—I herewith submit the following report for the year ending December 31, 1926.

The following statistics refer to milk, cream, ice cream, butter-milk and oleomargarine consumed and produced in the city of Quincy:

Dairies in the City of Quincy

1 cow	20
2 to 5 cows	6
5 to 10 cows	3
11 to 25 cows	9
25 to 85 cows	4
Total number of dairies in Quincy	42
Total number of dairies in nearby towns	12

Total number of cows in Quincy	437
Total number of cows in nearby towns	287
Total number of cows supplying milk to Quincy.....	724
Milk produced in Quincy and nearby dairies (quarts).....	7,240
Milk contractors' processing and storage plants:	
In Quincy	6
In Braintree	2
In Randolph	2
In Holbrook	1
In North Hanover	2
In Milton	3
In Southboro	1
Teams, auto cars and trucks employed in the distribution of milk, cream, buttermilk and ice cream	126
Milk consumed in city of Quincy per day (quarts).....	31,731
Pasteurized milk consumed in Quincy (quarts).....	24,491
Raw milk consumed in Quincy (quarts)	7,240
Grade A baby and special milk in Quincy (quarts).....	2,021
Certified milk in Quincy (quarts).....	250
Per cent pasteurized	77
Per cent raw	23
Cream consumed in city of Quincy (quarts).....	1,170
Ice cream consumed in city of Quincy (gallons).....	2,710
Ice cream produced in Quincy per day (gallons).....	575
Buttermilk consumed in Quincy (quarts).....	341
Number of dairies scored in Quincy and nearby dairies.....	68

Table Classification of Dairies Inspected and Scored

Scoring 30 to 40.....	7
Scoring 41 to 50.....	17
Scoring 51 to 60.....	29
Scoring 61 to 70.....	11
Scoring 71 and over.....	4
	68
Retail licenses issued, milk, ice cream and oleomargarine.....	830
Milk producers' licenses issued	41
Number of cows examined	726
Milk samples collected for chemical test.....	672
Milk samples collected for bacteria.....	672
Total	1,344
Number of stores visited.....	678
Number of dairies visited.....	275
Number of milk rooms visited.....	165
Number of milk processing plants visited.....	119
Ice cream manufacturing and storage plants visited.....	50
Restaurant, lunch and ice cream parlors visited.....	21
Milk storage plants visited.....	10
Cows examined for pus and streptococci.....	50

Milk samples for pus and streptococci.....	29
New milk rooms constructed and remodeled	7
New cow stables constructed and remodeled.....	4
Revenue from milk, ice cream and oleomargarine.....	\$433.50

The price of milk in the City of Quincy for the year 1926 has remained the same as 1925; cash and carry chain stores 12 cents per quart to 15 cents per quart for family milk distributed to certified which is 30 cents per quart.

This branch of Public Health work has been conducted in substantially the same manner as last year. All milk sold and produced in Quincy is pasteurized or from tuberculin tested cows.

The aim in view has been to secure for the City of Quincy a clean, fresh and healthful supply as well as one that will not fall below the standard prescribed by the law.

Respectfully submitted,

JAMES O'DOWD,
Acting Milk Inspector.

REPORT OF INSPECTOR OF MEATS AND PROVISIONS

DECEMBER 31, 1926.

TO THE COMMISSIONER OF HEALTH, *Quincy, Mass.*

DEAR SIR:—I submit herewith the report of the work in this office for the year ending December 31, 1926.

Inspections made 945

Meats and Foodstuffs Condemned as Unfit for Food

Beef (pounds)	68
Pork (pounds)	43
Lamb (pounds)	43
Poultry (pounds)	40
Beef liver (pounds)	10
Pigs' feet (pounds)	10
Veal (pounds)	12
Salt ribs (pounds)	5
Fish	22
Clams	8

Financial Statement

Appropriation\$150 00

Expended:

Transportation	\$107 00
Clerical	10 00
Office	3 30
Telephone	10 00
	130 30

Unexpended balance \$19 70

The work of this office is divided into two parts, regular inspections of stores and markets and all food shops where meats are sold.

I have attended to the first by doing double time on inspection work.

The second part is investigating individual cases where complaints are made and the food purchased has not been good. Very few complaints of this nature have been made this year.

The business section of our city is gradually broadening from the Center district. Many small blocks of stores have been erected in our outlying districts, which gradually increase our work.

The small dealers are commencing to realize the importance of keeping their store clean and attractive, with more up to date sanitary fixtures and more modern display cases for their stock. The large merchant needs no reminder as to the importance of keeping their store and fixtures in a sanitary condition.

Our Department of Health is of the highest standard at the present time and nothing is neglected to see that the public get good meats and foodstuffs from our dealers at all times.

Respectfully submitted,

HOWARD ROGERS,

Inspector of Meats and Provisions.

REPORT OF CONTAGIOUS NURSE

JANUARY 1, 1927.

DR. FRED A. BARTLETT, *Health Commissioner*.

DEAR DOCTOR:—I herewith respectfully submit my report as the Contagion Nurse for the year ending December 31, 1926.

Diphtheria	54
Scarlet fever	247
Measles	203
German measles	46
Whooping cough	65
Chicken pox	106
Mumps	136
Lobar pneumonia	44
Influenza	10
Typhoid fever	8
Rabid dog bite	2
Ophthalmia neonatorum	3
Anterior poliomyelitis	2
Cerebrospinal meningitis	1
Syphilis	2

Diphtheria

There were 54 cases reported during the year, the lowest number reported since 1912. Of this number 11 cases were cared for at Brighton Hospital. There were four deaths in all from this disease, three in the city and one in the hospital. Two hundred and forty-seven cultures were taken. From these cultures some of the contacts were found to be carriers.

The "Schick" test was given in the grammar schools during the past year in co-operation with the School Department, the School Physician and school nurses assisting. Of the 3,749 pupils schicked, 3,613 readings were taken and only 779 pupils were found to be immune, 17.1 per cent under 10 years of age and 26.2 per cent over 10 years of age.

Scarlet Fever

There were 247 cases in the city. Majority of these were children. The cases were of such a mild type that they were not discovered in time to prevent contact with other children. This was especially in South Quincy.

There was an outbreak in the first and second grades in the Adams School during October and November. In an endeavor to check the spread of the disease, members of the Department of Health visited the school each morning to get a list of the absentees. The home was visited to find the reason for the child's absence. If a suspicious case was found it was referred to the Health Commissioner or else the family called in their family physician. The parents of the children gave very fine co-operation. The children in school were inspected every morning by the school physician and school nurse.

A new anti-toxin for treatment of scarlet fever was used for the first time during 1926. Wonderful results were reported from

physicians who had used it. There were three deaths in the city, two being in the same family, both under five years and one in Brighton Hospital. Thirty-eight cases sent to Brighton Hospital.

Measles

A decided decrease is noted from last year's report. Most of these cases occurred in April, May and June and affected principally Wards 5 and 6. Two cases were taken to the hospital, one death resulted from this disease.

Whooping Cough

Less than half as many cases were reported this year than last, with three deaths.

Chicken Pox—Mumps

There was a decided increase in the number of cases reported in both of these diseases.

Lobar Pneumonia

Twenty-six deaths occurred out of the 44 cases reported. Majority of these were middle-aged people.

Typhoid Fever

There were eight cases during the year. All cases were investigated. One case due to drinking impure water, another eating raw oysters, while the remaining cases were not able to give any definite history regarding the cause.

One cerebrospinal meningitis case was cared for at Boston Dispensary.

Of the two cases of anterior poliomyelitis reported one was removed to the Children's Hospital.

In connection with the contagion follow up work, 1,181 visits were made, including the taking of cultures, checking up quarantine rules and releases.

Certificates for re-admission into school for contacts as well as for those who have been in quarantine were issued from this office.

A new set of quarantine regulations were adopted during the year. The minimum requirements being reduced in many instances.

In closing I wish to thank the doctors of Quincy, members of the department and yourself for generous co-operation.

Respectfully submitted,

CATHERINE F. COLEMAN, R.N.,
Contagious Nurse.

REPORT OF QUINCY DISPENSARY

JANUARY 1, 1927.

DR. FRED A. BARTLETT, *Health Commissioner.*

DEAR DOCTOR:—The following report of Quincy Dispensary for year ending December 31, 1926, is respectfully submitted.

Cases of tuberculosis in city	291
Active cases	160
Arrested cases	77
Hospital cases	54
New cases reported during the year	81
Pulmonary	60
Hilum	17
Tuberculosis other	4
Disposition of new cases

Suspicious	3
Negative	0
Von Perquet Tests	15
Positive	6
Negative	9

During year 51 cases were referred to Norfolk County Hospital and all but five (5) were provided transportation.

Undernourished, underweight and contact clinics

Attendance	492
Clinics held	50
Referred for T&A operation	20
Vaccinations	8
Von Perquet tests done	149
Positive	47
Negative	102

The work at the Dispensary during the year has been interesting and progress obtained along the line of treatment and prevention of tuberculosis.

During the year, through the cooperation of several physicians of Quincy together with Rev. M. J. Owens, a very interesting and conclusive survey of the students attending St. John's Parochial School was made. In this school there are about five hundred (500) students and the standard of our survey was the same used by all recognized authorities.

We found a very large per cent (18 or 20) of these examined coming into the classification of (10 per cent or over) underweight. These children were then given the Von Perquet Test and X-rays taken of their chests. A large per cent showed conditions which are consistent with and definitely understood to be early signs of tuberculosis.

If similar conditions exist in the public schools of this city, and I am of this opinion, there are now some 2,000 children in our schools that are in the "so-called 10 per cent underweight class."

The only way to know is to make a public school survey, such as is being done by many of the cities of the Commonwealth, and which I strongly recommend.

In closing I wish to thank yourself and Miss Russell, the dispensary nurse, for your willing help in the work.

Respectfully yours,

C. J. LYNCH,

Dispensary Physician.

REPORT OF CHILD WELFARE PHYSICIAN

JANUARY 1, 1927.

DR. FRED A. BARTLETT, *Health Commissioner*.

DEAR DOCTOR:—The report of my work during the past year as Child Welfare Physician is as follows.

The individual clinics showed a decrease in attendance but the total attendance showed an increase because of the fact that the clinic in Ward 3 was not opened until October, 1925. The decrease in attendance was partially due to two reasons:

1. The policy of closing the clinics promptly at 4:15 P. M.
2. It was not possible to get so much assistance from graduate students of the Harvard Medical School.

The actual figures as to clinic attendance, mortality and cases referred to other agencies can be seen in the report of the Child Welfare Nurse. Almost five times as many babies were referred to private physicians as to hospital clinics.

The comparative tables of clinic attendance for 1925 and 1926 are as follows:

	1925	1926
Ward 1.....	2 per cent increase	23 per cent decrease
Ward 2.....	28 per cent increase	0.1 per cent decrease
Ward 3.....	Opened in October	First complete year
Ward 4.....	16 per cent increase	of operation
Ward 5.....	First complete year	32 per cent increase
	of operation	13 per cent decrease
Ward 6.....	36 per cent increase	28 per cent increase
Total.....	50 per cent increase	3 per cent increase

At the present time physicians from the graduate school of Harvard Medical School are in charge of the clinic in Ward 6.

The infant mortality for 1925 was 61 as compared with 53 for 1924. The infant mortality for 1926 is probably somewhat higher than that for 1925. There were 64 deaths under one year as compared to 53 in 1925. Thirty-five deaths occurred during the first two weeks of life and 38 in the first month. These may probably be ascribed to developmental conditions, prematurity, congenital debility, etc. There were 48 stillborn babies in 1925 as compared to 46 in 1924.

Until accurate birth returns are completed it is impossible to say whether the percentage of deaths due to congenital or puerperal causes is higher or lower than 1925.

There were five deaths under the age of 1 year due to contagious disease. There were six due to gastro-intestinal diseases. There were nine due to birth injury.

There was a marked increase in baby deaths in Wards 3 and 4. There was a slight decrease in Wards 2 and 6.

Toward the last of the year the Division of Mental Hygiene of the Department of Mental Diseases established a Habit Clinic in the Quincy Dispensary. This clinic is intended for the correction of certain physical habits, mental conditions or personality traits and for social conduct.

Recommendations for Improvement

1. Securing more suitable locations for the Wollaston and West Quincy Clinics.
2. Establishing of a Pre-School Age Clinic.
3. Securing another full-time Child Welfare Nurse.
4. Establishing of a "Posture Class" for children suffering from postural defects.
5. The institution of a campaign for immunizing children of pre-school age against diphtheria.
6. Establishment of a "Health Centre" for the correlation and centralization of prenatal work, infant welfare clinics, tuberculosis prevention, dental hygiene, pre-school clinics, posture and nutrition classes, habit clinics and diphtheria prevention.

Efficient public health work means directly a lowered death and sickness rate and indirectly a lowered tax rate for that community wherein the work is done.

In closing I should like to thank Mrs. Fowler, the Child Welfare Nurse, for her interest and co-operation, the personnel of the Health Department, the Fore River Club, the West Quincy and Atlantic Councils of the K. of C., the Presbyterian Church of South Quincy, the M. E. Church of Atlantic, Woodward Institute, the Quincy and the Wollaston Women's Clubs.

Very truly yours,

EDMUND B. FITZGERALD, M.D.,
Child Welfare Physician.

MORTALITY STATISTICS**Number of Deaths and Death Rates**

During the year 1926, there were 533 deaths which occurred in Quincy. This number was an increase of 49 over 1925 when there were 484 deaths. There was also an increase in the death rate. Based on the estimated population of 62,955 on July 1st (mid year), the death rate for 1926 was 8.5 per 1000 population as compared with 7.98 in 1925 which was the lowest rate in the history of Quincy.

SEX Of the 533 deaths in 1926, 290 or 54.4 per cent were males as compared with 50.2 per cent in 1925. The proportion of males in the population, as shown by the United States Census of 1920 was 50.6 per cent. The estimates for 1926 were 31,855 males and 31,100 females. Based on these estimates the death rate per 1000 for males was 9.1 and for females 7.8.

AGE Of the 533 deaths in 1926, 64 or 12 per cent were of infants under one year of age as compared with 11 per cent in 1925. Among the deaths registered during 1926 there were 4 over 90 years of age, 1 of whom was a male and 3 were females. The oldest was 100 years, 1 month, 20 days. The average age at death fell in the 60 to 64 year group.

NATIVITY 311 or 58.4 per cent of the decedents whose nativity was reported on the death certificate were native.

SEASONAL DISTRIBUTION OF DEATHS The largest number of deaths in any one month occurred in December when there were 62, and next largest was in May, when there were 57. The lowest number occurred in August when 32 were registered.

INFANT MORTALITY The deaths in 1926 were 64 per 1000 live births. The infant mortality rates since 1910 are shown below:

1910	103
1911	102
1912	82
1913	108
1914	75
1915	76
1916	72
1917	71
1918	90
1919	64
1920	66
1921	55
1922	73
1923	70
1914	53
1925	58
1926	64

The highest proportion of deaths under one year of age occurs during the early period of infancy and especially is this true of the first week. In 1926 there occurred 26 deaths in the first week constituting 40.6 per cent of all deaths under one year of age. In the first month there were 38 deaths or 59.4 per cent of all infant deaths.

CAUSES OF DEATHS:

PNEUMONIA caused 49 deaths in 1926 or 77 per 100,000 population. It was responsible for 48 deaths or 74 per 100,000 population in 1925.

HEART DISEASE. The deaths from heart diseases in 1926 numbered 124 or 23.3 per cent of all deaths or 194 per 100,000 population as compared with 114 deaths or 23.6 per cent of all deaths or 190 per 100,000 population in 1925.

TUBERCULOSIS in its various forms claimed 28 victims in 1926, of whom 25 died from tuberculosis of the respiratory system. Deaths from tuberculouis constituted 5.3 per cent of all deaths in 1926. The rate per 100,000 population for 1926 was 44.5 as compared with a rate of 48 in 1925.

CEREBRAL HEMORRHAGE and apoplexy caused 41 deaths or almost 8 per cent of all deaths or a death rate of 65 per 100,000 population. In 1925 there were 42 deaths from this cause corresponding to almost 9 per cent of deaths from all causes or a death rate of 70 per 100,000 population.

CANCER and other malignant tumors caused 56 deaths in 1926 corresponding to a death rate of 89 per 100,000 population as compared with 51 deaths with a rate of 85 in 1925.

BRIGHT'S DISEASE and nephritis were the cause of 44 deaths in 1926 corresponding to a rate of 70 per 100,000 population as compared with 36 deaths and a rate of 60 per 100,000 in 1925.

CONGENITAL MALFORMATIONS and diseases peculiar to early infancy caused 32 deaths in 1926, a rate of 51 per 100,000 population compared with 27 deaths and a rate of 45 in 1925.

EXTERNAL CAUSES. The number of deaths from external causes was 40, with a rate of 63 per 100,000 population as compared with 38 deaths in 1925. The rate was the same as 1926, namely 63 per 100,000. Automobile accidents were the cause of 9 of these deaths in 1926 as compared with 10 in 1925.

LIST OF CAUSES OF DEATHS—1926

List No.	Cause
I. Epidemic, Endemic and Infectious Diseases

REPORT OF BACTERIOLOGIST

JANUARY 1, 1927.

DR. FRED A. BARTLETT, *Health Commissioner.*

DEAR DR. BARTLETT:—The total number of milk, cream and ice cream samples collected during the year was 1344; 43 collections contained 688 samples for bacteriological examination; and 41 collections containing 656 samples for determination of butter fats and total solids.

Yours truly,

EDWIN E. SMITH, M.D.

REPORT OF TUBERCULOSIS NURSE

JANUARY 1, 1927.

DR. FRED A. BARTLETT, *Health Commissioner.*

DEAR DOCTOR:—I herewith submit to you my annual report for the year ending December 31, 1926, of the Tuberculosis Dispensary.

Cases of tuberculosis in city.....	291
Active cases	160
Arrested cases	77
Hospital cases	54
New cases reported during the year	81
Pulmonary	60
Hilum	17
T/B other	4
Disposition of new cases	
Admitted to sanatoria	22

Suspicious	3
Negative	0
Von Perquet Tests	15
Positive	6
Negative	9

Fifty-one (51) cases were referred to the Norfolk County Hospital for X-ray during the year, and all but five (5) were provided with transportation.

Undernourished or Underweight and Contact Clinic

Attendance	492
Clinics held	50
Referred for T&A	20
Vaccinations	8
Von Perquet tests done	149
Negative	102
Positive	47

Through the kind cooperation of Rev. M. J. Owens of the parochial School the Health Department was allowed to complete a survey on the children of that school. Of four hundred and twenty-three children weighed, 302, or 71 per cent, were normal or above weight; 43, or 10 per cent, were 7 per cent under weight; 54, or 13 per cent, were 10 per cent under weight; 24, or 6 per cent, were 15 per cent underweight. Per cent found to be 10 per cent or more under weight, 18.4.

With the permission of the parents, we did a Von Perquet Test (Tuberculosis Test) on the 10 per cent or more under-weight children. Of these 24 had positive reaction to the test, were X-rayed and found to have suspicious X-rays, meaning that it was very important for these children to be followed up in our Saturday morning clinic, and bring their weight up to normal.

The Saturday morning clinics have been very well attended by the children this year, and excellent results obtained. This clinic is really our Preventorium Clinic, and if, after trying, we do not get satisfactory results, we refer the child to a health sanatorium at North Reading. Ninety-nine per cent of all these cases return well.

In addition to this work we were fortunate in having the Norfolk County Hospital Camp, located on the grounds of the Norfolk County Hospital at South Braintree, opened for its third session July 1st, 1926, with an enrollment of 56 children, 36 boys (12 from Quincy) and twenty girls (9 from Quincy). We hope to send many more next summer.

The admission of the girls was a new feature, and one for which

we have striven for some time. Provisions for the girls had been made by the erection of two dormitories, each having ten girls, a small building for toilets, lavatories and shower baths, and a tent for two councillors. The camp is located on the opposite side of the grove from the boys' camp. The average gain for the boys was 4.09 pounds, while the average gain for girls was 7.35 pounds.

In closing, I wish to extend my appreciation and thanks to Dr. Fred A. Bartlett for his assistance and interest in the work, also Dr. Lynch, the Dispensary Physician, who personally attended to all the clinics and survey, the physicians of the city, Dr. Pillsbury of the Norfolk County Hospital and the personnel of the Health Department and also Mr. Hearn and Miss Waddell, who rendered aid to the less fortunate cases.

Respectfully submitted,

GERTRUDE T. RUSSELL, R.N.,
Dispensary Nurse.

REPORT OF VENEREAL DISEASE PHYSICIAN

JANUARY 1, 1927.

DR. FRED A. BARTLETT, *Health Commissioner*.

DEAR DOCTOR BARTLETT:—Herewith is my report of work performed in Venereal Disease Clinics at the Dispensary during the past year:

Total number of visits to the clinic	331
Number of diagnosis or treatment of gonorrhoea	26
Number of diagnosis or treatment of syphilis	305
Wasserman tests	22
Injections arsphenamine	126
Injections mercury	115

Yours truly,

EDWIN E. SMITH, M.D.

REPORT OF CHILD WELFARE NURSE

JANUARY 1, 1927.

DR. FRED A. BARTLETT, *Health Commissioner*.

DEAR SIR:—I herewith submit my seventh annual report as Child Welfare Nurse for the year ending December 31st, 1926.

Because of the number of clinics being held, it was found impossible to do very much follow up work.

However, there were 473 visits made to babies under two years old. Eighteen boarding houses for infants were inspected and homes found for seventeen babies. Fifty-eight cases were referred to hospitals for further treatment and two hundred and eighty babies were referred to family physicians.

There were sixty-four deaths, in the City, of babies under one year of age. Of this number there were four babies under clinic supervision, two had been once to clinic, but had several home visits.

Causes of death as follows:

Lobar Pneumonia (twins) six months old.

Whooping Cough (1) six weeks old.

Pneumonia following measles (1) seven months old.

There was one death, twenty-three months old, cause: Sarcoma of the Eye.

The number of babies registered during the year at the clinics was 1,561. Of this number 431 babies were removed from the roll during the year by death, leaving the City, or being over the age limit which is two years. There were 497 new babies enrolled.

On January 1, 1927, there were 1130 babies registered under two years.

During the year 1926, two hundred forty-two clinics were held with a total attendance of 7,800 babies. There were 2,815 complete or partial examinations made by Dr. E. B. Fitzgerald and his assistants.

The total attendance at clinics since 1920 is as follows:

1920	1921	1922	1923	1924	1925	1926
539	2,504	2,757	3,686	5,023	7,550	7,800

The total attendance for 1926 in the various wards is as follows:

Ward 1—Woodward School, Thursdays	1,779
Ward 2—Fore River Club House, Fridays	843
Ward 3—Presbyterian Church, Fridays	1,053
Ward 4—K. of C. Hall, Mondays	738
Ward 5—Library Building, Tuesdays	2,340
Ward 6—K. of C. Hall & M. E. Church, Wednesdays	1,047

At this time I wish to thank the Health Department, Quincy City Hospital, Quincy and Wollaston Women's Clubs, District Nurses Association and physicians of Quincy for their many courtesies extended to me and to the Child Welfare Clinics.

To Dr. Edmund B. FitzGerald and his assistants, my thanks are expressed for their kindness to me and for their untiring attention and interest in the future generation.

Respectfully submitted,

NETTIE DENTON FOWLER, R.N.,
Child Welfare Nurse.

REPORT OF THE PRENATAL NURSE

JANUARY 1, 1927.

DR. FRED A. BARTLETT, *Health Commissioner.*

DEAR DOCTOR:—I herewith submit to you my first annual report as Prenatal Nurse for the year ending December 31, 1926.

After my appointment January 7, 1926, I did the work of the Child Welfare Nurse during her illness from January 7th until April 30th, 1926, inclusive.

I conducted the Child Welfare Clinic at Quincy Point every Friday afternoon. The report of attendance is found in the report of the Child Welfare Nurse.

On May 1, 1926, a start was made in organizing the prenatal work. Visits were made to the local practising physicians to explain the purpose of the work, and it was through these visits that the physicians referred cases to me.

1. The object of prenatal nursing service in every community is to help in the medical care of pregnant women.
2. The reduction of sterility by securing proper care for mothers and the consequent reduction of infection.
3. The lessening of the number of abortions.
4. The lessening in the number of premature deliveries.
5. The reduction in the number of stillborn.
6. The saving of infant life during the neonatal period.
7. The saving of the health of the mothers.

Through the efforts of the Health Commissioner reduced rates at the Quincy City Hospital were secured for worthy cases. The Family Welfare Society cooperated by supplying clothing for mothers and babies.

Each prenatal patient was visited at least once a month for the first seven months and twice a month thereafter. At these visits the nurse gave the instructions regarding the clothing for mothers.

Diet.

Exercise.

Layette.

Preparation for delivery.

Care of the baby.

Record forms approved by the State Board of Health are kept on all patients.

During September I took a three weeks' course at the Massachusetts Homeopathic Hospital for urinalysis and blood pressure.

During July, on the vacation of the Contagious Nurse, I conducted her work, and August the T. B. work.

Prenatal visits	550
Urinalysis	126
Blood pressure	50

In closing I wish to extend my appreciation and thanks to Dr. Fred A. Bartlett for his assistance, the local physicians of Quincy, Miss Waddell of the Family Welfare, and the personnel of the Health Department.

Respectfully submitted,

MARY KEELEY, R. N.,
Prenatal Nurse.

REPORT OF PLUMBING INSPECTOR

JANUARY 1, 1927.

DR. FRED A. BARTLETT, *Health Commissioner.*

DEAR SIR:—As inspector of plumbing I have the honor to submit my thirty-third annual report.

Number of applications received from January 1, 1926, to

MARGARET D. MILLER, R.N.	Surgical Supervisor
ANN T. PARADISE, R.N.	X-Ray Technician
ZANA L. PADDOCK	Dietitian

REPORT OF THE BOARD OF MANAGERS

*To His Honor the Mayor and the
President and Members of the City Council.*

GENTLEMEN:—The Board of Managers of the Hospital Department respectfully submits its report for the year ending December 31st, 1926.

During the year Mr. Herman G. Bryan resigned from the Board, and Mr. Ernest B. Neal was appointed to fill the vacancy.

The new building was opened for the patients in June, and has fully met our expectations, particularly the second floor, which is entirely used for maternity cases.

The new Nurses' Home, which is very much needed, will be finished and ready for the nurses about April 1st, 1927.

The use of our X-Ray Department is increasing very rapidly, and now shows a substantial profit to the hospital.

We gratefully acknowledge your hearty cooperation, the generous contributions and the active and helpful interest of the hospital aid associations, the churches and other organizations of the city, and the many words of appreciation and suggestions from our patients and friends.

The financial statement of the operations of the past year, together with the report of the superintendent, are annexed hereto.

CHARLES A. PRICE, *Chairman*
MAURICE P. SPILLANE, *Secretary*
GEORGE TAYLOR
JOHN O. GOLBRANSON
ERNEST B. NEAL

REPORT OF THE SUPERINTENDENT

To the Board of Managers, Quincy City Hospital.

GENTLEMEN:—I herewith submit to you a report of the work done at the Quincy City Hospital during the year ending December 31, 1926.

Statistical Information

Patients in hospital January 1.....	63
Patients admitted during the year.....	2,666

Stocks

The increase of work since the opening of the new building in June has proven the long felt want of accommodations to care for people of moderate means in their own community.

The growth of the Training School has reached the stage where it was necessary to employ a superintendent of nurses, and Miss Martha E. Kehoe, a graduate of Butler Hospital, was appointed to fill this position.

Through the kindness of Mr. Truman Temple, the librarian of the Thomas Crane Library, a bi-weekly distribution of books has been made possible and is greatly appreciated by all patients, children as well as adults.

The Hospital Aids have been most kind and helpful, not only with the sewing but also in bringing cheer to the sick who are alone.

I wish to extend to the doctors many thanks for their cooperation and loyalty to the institution.

Respectfully submitted,

RUTH J. ADIE, R. N.
Superintendent.

REPORT OF THE SCHOOL OF NURSING

The enrollment of graduate and student nurses at the close of the year 1926 is as follows:

Superintendent of Nurses	1
instructors	2
Graduate head nurses	6
Operating room supervisor	1
Night supervisors	2
Graduate floor nurses	11
Students—Seniors	7
Intermediates	12
Juniors	30

Thirty-three students have entered during the year; eight students have graduated and ten have withdrawn for various reasons.

Perhaps the greatest change in the policy of the school has been the acceptance of a four months' affiliation with the Yale School of Nursing, New Haven Hospital, New Haven, Connecticut, affording us two months each of medical and contagious practical experience.

Affiliations with Massachusetts General Hospital and Boston City Hospital were discontinued; negotiations are also being made with the New Haven Hospital to arrange an additional pediatric affiliation.

The increased bed capacity called immediately for more nurses; this has been met for the time by employing graduate nurses for general floor duty.

Additional students necessitated more efficient instructions. Miss Margaret F. Maine, R. N., was appointed January 1, 1926, as practical instructor, also acting as an assistant in the training school office. Miss Ada M. Small, R.N., B.S., a graduate of the Newton Hospital, Newton, Massachusetts, also of Teachers' College, Columbia University, New York, who has previously served this school as visiting instructor, accepted the position of full-time theoretical instructor September 1, 1926.

Graduation exercises of the School of Nursing occurred June 29, 1926, with Mr. Price presiding and Miss Carrie Hall, R. N., Superintendent of Nurses, Peter Bent Brigham Hospital, making the graduation address. Diplomas were presented by Dr. Hunting, and school pins, provided by the Hospital Aid Association, were also presented at this time by the president, Mrs. Carl Hayward.

Class of 1926

Katherine Agnes Murphy
Eileen Mary Garrity
Verna Tibbetts
Helen Dorothy Casey

Hazel Rose Schools
Edna Irene Elliott
Martha Mabel Decoste
Blanche Marie Murphy

Our new nurses' home will soon solve many of our problems in providing suitable and adequate housing, teaching and recreation facilities.

We wish to extend our thanks to the many friends, also to the members of the Hospital Aids, who have remembered the nurses in many ways throughout the year. A gift of a manikin from members of the Quincy City Hospital Alumnae Association has recently been added to our teaching equipment. This is greatly appreciated and will aid us in giving more efficient instruction in anatomy.

We also desire to record our appreciation to the members of the attending staff and home staff for their professional services rendered to the graduates and students of the school and for their assistance in the classroom.

Respectfully submitted,

MARTHA E. KEHOE, R. N.,
Superintendent of Nurses.

Synopsis of the Course of Instruction

The theoretical and practical course of instruction conforms closely to the standard curriculum prepared by the Educational Committee of the National League of Nursing Education. The time allotted to the subject will be divided among lectures, demonstrations, classes, clinic, quizzes and laboratory work.

Preliminary Course—Four Months

Practical Nursing, Theory and Demonstration	M. F. Main, R. N.	90	Hours
Bandaging	M. F. Main, R. N.	15	"

Affiliations

A four months' course is given at the New Haven Hospital, New Haven, two months medical and two months contagious practical experience. Experience in Visiting Nursing is given under the supervision of the Quincy Visiting Nurses' Association.

Students are accepted in the school February and September of each year. Further information concerning the School of Nursing will be sent on written request.

Directions for uniforms and information concerning capes, etc., will be sent with the acceptance slip.

Dishes and pans.....	100 00
Total	\$52,010 00

CONCLUSION

This department was unfortunate in losing Chief Alfred W. Goodhue who passed away on May 23rd, 1926, after an illness of several weeks. His high character and great ability are so well known, that anything that I could say in praise would be superfluous.

The new station was occupied on July 8th and is a building well fitted for the use of this department.

The signal system has been modernized and brought up-to-date with the latest system of flashlights for signalling to the officers, when they are wanted to communicate with headquarters. The work on the signal system is not yet complete, as some of the boxes have not been rebuilt, but this work is under way and should be completed within a short time.

During the rebuilding of the system, it was found that the old cable on Hancock street was in poor condition, some of this has been replaced with new, and I am informed by the Superintendent of Fire Alarm that it will be necessary to renew the rest of it before we can hope for satisfactory results.

We now have seventeen flashlights in service and I would recommend that this system be extended each year and new lights added, so that eventually the whole city will be covered.

The motor patrol has proven itself to be a valuable addition to the department. We have two sedans, which are used for this purpose at night, and by the inspectors in making investigations at other times. I would recommend that another auto be purchased for the use of the inspectors as there are four men in that department with only two cars available in the day-time and none at night.

I believe that something should be done to meet the demands caused by the ever-increasing traffic and I would recommend that some type of automatic traffic signal be installed on Hancock street and at some of the other dangerous intersections.

In conclusion, I wish to thank His Honor, Mayor Barbour and the members of the City Council, the City Auditor and his staff and all other City Officials and employees, who by their encouragement

and assistance, have aided the police department during the past year.

I also wish to extend my thanks to the justices, clerks and the officers of the District Court, also the District Attorney and his assistants for the courtesy and kindness they have shown the members of the department.

The members of the police department also deserve the highest praise for the efficient manner in which they have discharged their duties in the many trying and often dangerous situations into which their duty takes them.

Respectfully submitted,

ERNEST H. BISHOP,
Chief of Police.

REPORT OF FIRE DEPARTMENT

QUINCY, MASS., January 1, 1927.

HON. THOMAS J. McGRATH, *Mayor, City of Quincy, Quincy, Mass.*

DEAR SIR:—I respectfully submit the annual report of the Fire Department for the year ending December 31, 1926.

ORGANIZATION

Chief of Department—Alfred L. Mead.

APPARATUS

Central Station

One chief's car.
 One auto pumping engine.
 One combination ladder truck.
 One combination Hose Truck.

Wollaston Station

One auto pumping engine.
 One combination ladder truck.

Atlantic Station

One auto combination pumping engine.

Quincy Point Station

One auto combination pumping engine.

West Quincy Station

One auto combination pumping engine.
 One auto combination ladder truck.

Houghs Neck Station

One auto combination hose truck.
 One auto combination ladder truck.

Squantum

One portable house with hand reel (350 ft. of hose).

Fire Alarm

One Dodge truck.

FIRE ALARMS

During the year there have been 665 alarms:

Bell alarms, 175.

Still and telephone, 490.

False alarms, 42

The Central station responded to 318 alarms, 124 bell, 194 still or telephone.

The Wollaston station responded to 205 alarms, 66 bell, 139 still or telephone.

The Atlantic station responded to 178 alarms, 58 bell, 120 still or telephone.	
The Quincy Point station responded to 107 alarms, 57 bell, 50 still or telephone.	
The West Quincy station responded to 105 alarms, 37 bell, 68 still or telephone.	
The Houghs Neck station responded to 55 alarms, 9 bell, 44 still or telephone.	
Total number of feet of hose laid.....	63,700
Central station laid	21,400
Wollaston station laid	12,900

December	522 00	472 00	994 00
Total	\$76,122 00	\$87,900 00	\$164,022 00

During the year two new pieces of apparatus (one a pumping engine and one ladder truck) have been added to this department, with four permanent men.

Houghs Neck station has been equipped with a ladder truck, and four more men assigned to that station.

A new house is under construction for the Atlantic district and two new pieces of apparatus have been ordered for the same. An order was passed by the City Council in 1926 calling for ten more permanent men for the purpose of taking care of the new Atlantic station. These men will report for duty on the completion of the station.

In conclusion I wish to express my sincere appreciation to the Mayor and Council for their cooperation with me the past year, and to the officers and members of the department for their valuable assistance rendered, I wish to thank them all.

Respectfully submitted,

ALFRED L. MEAD,

Chief of Fire Department.

REPORT OF INSPECTOR OF BUILDINGS

JANUARY, 1st, 1927.

HONORABLE THOMAS J. MCGRATH, *Mayor of Quincy, Mass.*

DEAR SIR:—I herewith submit the twentieth report of the Building Department for the year ending December 31, 1926. There has been a gradual falling off during the year of building operations, but the city of Quincy has maintained its place, in comparison with others cities and towns of the Commonwealth.

There have been 978 living apartments constructed during the past year. Fifty business blocks were also constructed which in most instances have been immediately occupied.

As this completes the twentieth year in which the Building Ordinance has been in force, it may be of interest to present a tabulation of the number of permits issued, and the estimated cost of the work proposed in the applications filed during this twenty year period.

The Inspector of Buildings is at work on the revising of the Building Ordinance and it is hoped that the City Council will pass upon the revision at an early date, as several buildings are in prospect in which the welfare of the city is concerned and in which the new ordinance would control and be of substantial worth.

TABULATIONS OF BUILDING OPERATIONS FOR 1926

Ward 1

Permits	Estimated Cost
121 One family dwellings	\$618,100 00
14 Two family dwellings	95,600 00

SEWER DEPARTMENT

QUINCY, MASS., APRIL 7th, 1927.

MR. F. E. TUPPER, *Commissioner of Public Works, Quincy, Mass.*

DEAR SIR:—I herewith submit a description and tabulation of the work of the Sewer Division, Public Works Department, during the year 1926. For financial statement see the Auditor's Report.

4,488 miles of common pipe sewers were constructed during the year, varying in size from 8" to 15", making a total of 107.88 miles of sewers to date.

The most important piece of construction was the laying of approximately one half mile of sewer main, into the Merrymount Section. When the various laterals are connected into this main sewer 75 per cent of the Merrymount territory will be taken care of. This ought to be done during the year 1927.

The number of house connections made to buildings during the year was 527 in wards as follows:

Ward 1	70	Ward 4	62
Ward 2	57	Ward 5	140
Ward 3	64	Ward 6	134

The total number of feet built, 23,942.20, at a cost of \$23,784.96, thus making the average cost per foot \$0.993.

The average length per connection.....	45.43 feet
The average cost per connection.....	\$45.13

Single houses	351	Gas Stations	5
Two-family houses.....	117	Mercantile	17
Three-family houses.....	2	Manufacturing	5
Four-family houses	11	Garage	3
Apartment blocks	2	Halls—Community Homes.	4
Hospital	1	Dormitory College	1
Nurses Home	1	Police Station	1
Bath houses	3	Almshouse	1
Theatre	1		
Church	1		

We have done about the usual amount of cleaning and repair work during the year. This work has been carried on as far as possible during the winter months when we were not busy on new construction. Following please find a list of sewers built during the year 1926.

Respectfully submitted,

WALTER S. MCKENZIE,
General Foreman, Sewer Department.

REPORT OF INSPECTOR OF WIRES

JANUARY 1, 1927.

HON. THOMAS J. MCGRATH, *Mayor of Quincy, Mass.*

DEAR SIR:—I respectfully submit my annual report as Inspector of Wires for the year ending December 31, 1926.

Inspection in Buildings

The following specified schedule of electrical inspections made of lights and other appliances installed:

Number of permits issued, 1926.....	1,484
Fees received for above	\$1,828.00

Fees received from January 1, 1926 to December 31, 1926, inclusive:

January	87	August	192
February	64	September	152
March	74	October	323
April	73	November	200
May	166	December	84
June	125		
July	288		1828

Number of electricians doing work in 1926.....	211
Inspections made as per permits issued.....	2,116
Number of unfinished installations.....	301
Number of installations reinspected.....	106
Number of defects in installations reinspected....	106
Total inspections made during the year.....	2,212
Permits issued to Quincy Electric Light & Power Co., to install service & electrical appliances	1,612
Number of lights wired for	27,878
Number of motors wired for, horse-power equals	1139-235 motors
Four electrical ranges installed, total watt cap.	21,000 watts
2,000 electric irons, total watt cap.....	1,200,000
Temporary lights for parties, fairs, street decorating and building operations	no record
Two moving picture machines, total watt cap....	1,800 watts

Number of New Buildings Wired

Single houses.....	737
Two apartment houses.....	170
Three apartment houses.....	6
Four apartment houses.....	16
Mercantile houses.....	37
Manufacturing	5
Garages	9
Miscellaneous	34

WILLIAM L. FOSTER,
Treasurer.

Hingham, December 31, 1926.

TRUSTEES OF WEYMOUTH FORE RIVER BRIDGE,

GENTLEMEN:—I have examined the accounts of William L. Foster, Treasurer of the Trustees of Weymouth Fore River Bridge for the year 1926, reconciled the bank account, and I hereby certify that the same are correct with proper vouchers.

J. IRVING BOTTING,
Town Accountant.

Hingham, January 3, 1927.

REPORT OF CITY PLANNING BOARD

To His Honor the Mayor and Members of the City Council.

GENTLEMEN:—While intensive studies have been made upon various projects the past year, we are at this time only submitting the following definite recommendations.

Recommendations

We recommend the acceptance of the easterly end of Darrow Street at Houghs Neck to connect with River Road, laid out 50 feet wide, passing the City Public Landing, to the junction of Sea Street near the steamboat pier. This will go far to divide the traffic in Houghs Neck for through travel can be had by continuing directly on Darrow Street, thence along the bay front returning via Sea Street, or the reverse. In our judgment the time to do this is now, before the possibility of construction near the steamboat landing increases the expense of the taking.

We recommend building lines be immediately placed upon the following streets out of city square before changes make the details expensive. We recommend these in accordance with studies on file with the City Engineer.

Granite Street from Hancock to Upland Road.

Maple Street—Entire length.

Chestnut Street—Entire length.

We respectfully renew our plans for building lines to be placed upon Foster Street and Cottage Avenue, making these ways uniform in width.

Recommended For Future Development

We have made studies the past year looking to the extension of Newcomb Street across Canal Street, substantially along the taking of the present sewer layout to Washington at Pond Street. This will give an intermediate thoroughfare direct from Greenleaf to Washington with the possibility of extension from Greenleaf to Merrymount or Butler Road.

Also we have prepared a study of a way parallel and immediately to the east of the New Haven road, including the present way into the Miller garage and that at the station from Dimmock Street to run through to Granite Street and eventually connect with a direct way through the Edwards Meadow to School and Franklin Streets.

We find that a thoroughfare made up along the line of the old Scotch Pond hollow road will make an easy grade, avoiding Cranch Hill and a direct thoroughfare from Adams at Whitwell to Granite and both connecting with the plan of School and Marsh Streets. There is possibility evident of the extension of this thoroughfare at Whitwell and Adams, northerly to South Central Avenue and eventually to Holbrook Road at Montclair.

We have been over the Sawcut Notch Road upon the easterly boundary of the Blue Hill Reservation and favor the opening of this road to automobile traffic, providing a direct thoroughfare

from the concrete road at Willard and West Streets, through Highland, Thatcher and Blue Hill Parkway, Milton, direct to and from Mattapan.

Oakland Avenue should be extended from its terminus at Furnace Brook Parkway through to Adams Street in accordance with the intent as filed and recorded by its former owner.

We recommend that the proper authorities at this time take such action with the State that Moswetusset, at the northerly end of the Quincy Shore Drive, be preserved to the public.

Comfort Station

We have an entirely feasible plan of layout offered for your consideration January 12, 1924, of a Comfort Station, located at the front of the basement of City Hall which will fill all requirements for many years to come.

Traffic

We are appending herewith details of the traffic census taken June 5th for 16 hours at 21 of the busiest points of the city. This gives somewhat of an index of the traffic situation with the exception of the fact that it was early in the season for summer traffic. This was particularly noticeable upon the State Highway on Willard Street. The details of this enumeration were skillfully and faithfully carried out by troops of Boy Scouts ably supervised by their captains and commissioners. We cannot too heartily commend their industry and perseverance, especially at certain periods of the day under unfavorable weather conditions. The intensity of city traffic has led us to investigate a possibility which may come of dividing the grades of cross-town traffic from our intensive through travel. Also the possibility of modern, light, standard foot bridges designed so as not to obstruct sidewalk traffic, to cross at some of our more intensive points.

Our Board has been represented at the hearing upon the deepening of the channel in Dorchester Bay, held with the Maritime Division of the Boston Chamber of Commerce.

We were also represented at the Salem conference of the Massachusetts State Federation of Planning Boards.

Regional conferences have been held with Weymouth and Braintree, and a conference held at Quincy with Milton Planning Board and various other principal parties at interest, resulted in an agreement to request legislative action looking toward the widening of Adams Street from Furnace Brook Parkway in Quincy to Brook Road in Milton, and of Willard Street from the West Quincy station through Granite Avenue to Adams Street at East Milton.

We are able to note at this time that our Pilgrim Highway, in a modified form, is being started under various contracts with the probability of its being completed January 1, 1928.

An extension of the Shore Reservation Road from Black's Creek to meet the Pilgrim Highway at Sea and Canal Streets is the subject of Senate Bill No. 34 for the coming session.

We are offering for our Frontispiece the proposed addition to our civics center group. Also we have taken a view of a model community at our shore front which will stand as an example, particularly as to valuable area permitted for open space in a development where the example is needed.

We are also introducing a view with which the citizens generally will not be familiar, of a rapidly developing industry with its 600 foot pier extending into Town River.

At the beginning of this year we regret that we have to note the resignation of Mr. Edward E. Palmer from this Board, after a long period of valuable service both in City planning and in the City government. His removal to an adjoining town, we are certain, will be an addition to the civic power of that community.

In closing our report we wish to express our appreciation of the work of the Park Commission in the constructing and opening to the public of Pine Island bridge at Merrymount Park. It opens an area in which more of the citizens of Quincy should find enjoyment.

The repeal of our Zoning Law in March leaves the city unprotected in that direction and places the community a step back in progress as viewed by our sister cities, the Commonwealth and nation.

Respectfully submitted,

CITY PLANNING BOARD

BOARD OF SURVEY

JANUARY 6, 1927.

HON. THOMAS. J. MCGRATH, *Mayor, Quincy, Mass.*

DEAR SIR:—I am enclosing herewith the report for the year 1926 of the Board of Survey.

Very truly yours,

WALLACE S. CARSON, *Clerk.*

JANUARY 1, 1927.

To His Honor, the Mayor and Members of the City Council.

GENTLEMEN:—The Board of Survey respectfully submits herewith its twelfth annual report for the year ending December 31, 1926.

The Board organized on January 11, 1926, and elected Mr. William G. Shaw Chairman for the year 1926.

The Board had a very busy season as they were enforcing their new set of Rules and Regulations. They held twelve public hearings and meetings during the year.

The Board was properly functioning in regard to developers who thought that they could get away with anything they wished. They had wonderful cooperation from the Sewer and Water Departments in holding up utilities until the requirements of the Board were met.

Public hearings were held and approval given to the following new streets:

George Road

Douse Road

Lillian Road

Morgan Road

Petition by George V. Douse and Lillian Douse

Nicholl Street

Alton Rd. Ext.

Petition by William Nicholl

Kennard Road

Florence Street

Thornton Street

Estabrook Road

Petition by N. G. Nickerson.

Conrad Street

Petition by Hilda Almquist.

Ida Street

Petition by Ida Eloranto.

Checker Street

Chase Street

Petition by Wells G. Ruggles.

Alton Road

Madison Avenue

Dale Avenue

Crest Street
Petition by Timothy Jellow and George DiBona.
Ballou Street
Seymour Street
Sunnyside Road
Wallace Road
Petition by Madeline Saulnier.
Bay State Road
Petition by Catherine C. Pope.

Tentative approval of designs were granted on the following:

Burns Avenue
Charlesmount Street
Spence Street
Craig Street
Petition of Charles W. Bahr, Inc.
New Street off Furnace Brook Parkway
Petition by Fred B. Rice

Respectfully submitted,

WILLIAM G. SHAW, *Chairman.*
WILLIAM T. TEASDALE,
GEORGE H. NEWCOMB.

WALLACE S. CARSON, *Clerk.*

REPORT OF CITY SOLICITOR

JANUARY 3, 1927.

HON. THOMAS J. MCGRATH, *Mayor of Quincy, Mass.*

DEAR SIR:—During the past year the City Solicitor has carried on the work of the Law Department of the city in accordance with the requirements of the statutes and ordinances in relation thereto.

Respectfully submitted,

JOHN D. SMITH,
City Solicitor.

REPORT OF ENGINEERING DEPARTMENT

JANUARY 1, 1927.

To His Honor, the Mayor and Members of the City Council.

DEAR SIR:—I herewith respectfully submit the twenty-seventh annual report of the Engineering Department for the year ending December 31, 1926.

Lines and grades were given on about one hundred various accepted streets on request of property owners.

Rebuilt Streets

Adams Street, one of the most important traffic arteries in the City was rebuilt from the Milton Line to Newport Avenue. This street had a road surface of from 15 to 18 feet wide and a crown of from 6 to 14 inches which was very dangerous for travel. It has now been widened to a traveled surface 31 feet wide and a crown of 6 inches.

East Squantum Street from Hancock Street to Newbury Avenue was rebuilt and widened giving a traveled surface of 35 feet in width. This was formerly a traveled surface of about fifteen feet. As the new North Junior High School is located on the north side of East Squantum Street and a new Atlantic Methodist Episcopal Church is being constructed next to it this becomes a much needed improvement for the safety of the public.

The total miles of streets rebuilt in 1926 is 4.56 miles. For itemized list see schedule.

New Streets

There were approximately 15,550 feet of new streets accepted and built. The work starting in April and extending up to the first part of December. For itemized list see schedule.

Surface Drains

There were approximately 16,674 feet of Storm Drains placed in various streets. For itemized list see schedule.

There were three tide gates placed, one on the Hollis Avenue Drain, which was much needed as the Milton Road Drain enters at this point and the tides have been backing up in this drain.

A tide gate was placed on the westerly side of N. Y. N. H. & H. R. R. property just north of West Squantum Street on the drain that comes through the North Junior High School lot. This will insure against the flooding of the School Playground.

A tide gate was placed on the end of the Montclair Brook between John and Division Streets. There formerly was a gate at this point but it has not been working. This was replaced with a

concrete chamber and two gates. This will keep the tide waters out of the Montclair Playground and Montclair School Yard.

A study of the drainage problem in the City was made by Metcalf & Eddy, Boston, Mass.

In their report they have given the sizes and grades for all the main drains of the City. The laterals to be figured on the basis that these main drains will be laid.

The estimated cost for constructing these main drains amounts to \$1,500,000. This work can be spread over a period of years doing the parts that become necessary each year.

Sewers

Lines and grades were given on about 4.50 miles of sewer which was laid during the year.

The plans for assessment purposes for sewers laid were all made up and the assessment was ready to go out on December 31, 1926.

Assessors' Plans

The plans of the Assessors' Department were kept up to date and about 4500 transfers of properties were properly placed.

Permanent Sidewalks

There were 12,612 square yards of Granolithic walks placed on various streets throughout the City.

The calculations for the assessment of these walks are practically complete so that the assessment can go out at an early date. (For itemized list of these sidewalks see schedule.)

Amiesite Sidewalks

Amiesite was used on about 5710 feet of sidewalks in several sections of the City. (For itemized list see schedule.)

Playgrounds

There were four new playgrounds accepted by the City Council. Community Park which is at Petrel Road and Albatross Road in the Adams Shore Section.

William Norteman Park which is between Sea Street and Winthrop Street in the Hough's Neck Section.

Park Lane which is on North Fenno Street between Wendall Avenue and Franklin Avenue in the Wollaston Section.

Montclair Playground which is between Holbrook Road and Hamilton Avenue in the Montclair Section.

Public Buildings

The North Junior High School is practically finished. It is hoped to open this school in February, 1927. There will be some grading to be done on the playground adjacent to this building. I should recommend that this grading be at least up to grade 15 to insure against flooding by tides if the tide gate at the N. Y. N. H. & H. R. R. should go out of order at any time.

The South Junior High has been started and is expected to be put in use in September, 1927. This is on Granite Street near Centre Street. Some grading will be necessary in the rear which will be used for a playground.

The new Fire Station at Atlantic on Hancock Street near West Squantum Street is about sixty per cent complete. This should be ready in the Spring. There will be some grading to be done around this building and the lowest grade should be up to grade 15 at least.

The Police Station has been completed and is now in use.

At the Hospital the New Nurses Home is practically complete and can be put in use in a very short time.

The New Maternity Ward was completed and is now in use.

For Financial Statement see Auditor's Report.

I desire to express my appreciation of the work performed by the employees of this department, and the support and co-operation of City Officials.

Respectfully submitted,

WALLACE S. CARSON, *City Engineer.*

REPORT OF THE MANAGER OF PUBLIC BURIAL PLACES

January 1st, 1927.

HON. THOMAS J. MCGRATH, *Mayor of Quincy, Mass.*

Dear Sir:—

The Manager of Public Burial Places respectfully presents the following financial report for the year ending December 31, 1926:

Expenditures

Manager's salary	\$ 2,400 00
Superintendent's salary	2,200 00
Clerk's salary	650 00
Cemetery labor	17,517 75
Cemetery supplies	940 37
Telephone	80 61
Office supplies	158 23
Truck upkeep	462 65
Miscellaneous expense	554 29

\$24,963 90

Receipts

Care of lots	\$ 3,309 00
Sale of lots	6,665 00
Sale of graves	2,415 00
Opening graves	5,390 00
Foundation and grading	2,394 66
Perpetual care-fund—Interest	3,974 08
Other trust fund—Interest	191 87

\$24,339 61

	Appropriation	Expended
Grading, Mt. Wollaston Cemetery.....	\$2,500 00	\$2,500 00
Care, Hancock Cemetery	1,000 00	1,000 00

During the year ending December 31, 1926, there were 473 burials in Mount Wollaston Cemetery.

The sum of \$10,050.00 was added to the Perpetual Care Fund, a detailed statement of the investment will be found in the City Treasurer's report.

Respectfully submitted,

WELLINGTON W. MITCHELL,
Manager of Public Burial Places.

REPORT OF SEALER OF WEIGHTS AND MEASURES

QUINCY, MASS., JANUARY 1, 1927.

HON. THOMAS J. MCGRATH, *Mayor, Quincy, Mass.*

Dear Sir:

I respectfully submit the annual report of the Sealer of Weights and Measures Department for the year ending December 31, 1926.

During the year the sealer and deputy visited 1,302 places of business an increase of 86 over the previous year with fees amounting to \$870.05, an increase of \$106.30 over the 1925 collections. The above figures represent the actual sealing for which a charge is made and for which a fee is established by the state.

In this report will be found under the heading Inspections, a number of items of different commodities that were re-weighed after being put up for sale.

Below will be found a summary of work done by this department.

Respectfully yours,

JAMES M. CANTFILL,
Sealer of Weights and Measures.

ANNUAL REPORT OF THE PUBLIC WELFARE DEPARTMENT

QUINCY, JANUARY, 1927.

To His Honor, the Mayor of the City of Quincy:

Submitting my report for the year 1926 I wish to say that proper investigation was made on all new cases and continued supervision on all cases both new and old coming to the attention of this department.

I take this opportunity to thank His Honor, Mayor Perley E. Barbour, for his kind advice and cordial co-operation with me during my term of office.

The Financial Statement follows.

CHARLES C. HEARN,
Commissioner of Public Welfare.

The following is the financial statement for the year 1926:

Appropriations

Commissioner's salary	\$2,400 00	
Physician's salary	1,000 00	
Clerk	1,600 00	
Office	500 00	
Auto upkeep	300 00	
City home	10,000 00

ANNUAL REPORT OF THE PARK DEPARTMENT

To His Honor, the Mayor and Members of the City Council:

The Board of Park Commissioners report that during the year 1926 particular attention was given to the playgrounds throughout the city, installing suitable equipment and tennis courts.

The tennis courts at the Adams Playground, Ward 3, and at Mer-rymount have been in constant use during the season.

The South Street Playground has also been well attended.

For further information regarding expenditures and activities of the Parks, Playgrounds and Bath House, see Auditor's detailed report.

Respectfully yours,

WILLIAM J. SPARGO,
Park Commissioner.

REPORT OF THE TRUSTEES

To His Honor, the Mayor of the City of Quincy:

The trustees of the Thomas Crane Public Library submit herewith their fifty-sixth annual report.

It is gratifying to the trustees to report that the usefulness of the library system has increased during the year 1926. There has been a greater demand for books by the citizens generally, the increase in circulation being evidence of this.

The trustees are able to report again this year that the unit cost per circulation is much less than the average, which fact is, according to library experts, the best proof of economical management.

The branch at Montclair was established in December and from the expressions of opinion of residents of that locality it meets a long felt want. There is now a total of ten branches.

Mr. Edwin F. Livingston, one of the trustees and treasurer of the library, resigned on March 3, 1926, because of his removal to Vermont. Mr. Livingston's work in both capacities was of the highest order and the library department profited greatly from his keen business judgment and methods.

Mr. Vernon A. Field of the board resigned October 6, 1926, his health not permitting him to continue with his duties. Mr. Field was a man of literary mind and a lover of books, and his influence was strongly felt in the library work.

Mr. Thomas L. D. Gurney was appointed to succeed Mr. Livingston and Mr. Charles H. Johnson was appointed to succeed Mr. Field. Both of these gentlemen evinced a keen and active interest in their work on the board.

The hospital and school work has shown a marked increase and has received enthusiastic compliments.

The trustees take this opportunity to express publicly their appreciation of the generosity of the Education Committee of the Quincy Women's Club in their gift to the library of a series of books on progressive education and also of Mr. Fred B. Rice in presenting to the library a complete set of the early records of Plymouth Colony.

The principal thing needed now is a sufficient appropriation to keep pace with the growth of the city and the increasing demands made upon the library department. The need of more books is particularly stressed.

To the librarian and his staff there cannot be given too much praise. They have worked faithfully, loyally and conscientiously. Mr. Hill who took up his duties the first part of the year came well recommended and well equipped for his work. His breadth of vision and ability and efficiency as a librarian have been demonstrated throughout the year and he has merited the commendation given him by those who utilize the library facilities.

Respectfully submitted,

GEORGE E. ADAMS, *Chairman.*

GEORGIANA CUSHING LANE, *Secretary.*

LIBRARIAN'S REPORT

To the Trustees of the Thomas Crane Public Library:

The report of the Librarian for the year 1926 is herewith submitted.

I began my duties as your librarian on Feb. 1, 1926 and have therefore served eleven months. These eleven months have proved to me that I inherited from my immediate predecessor, Mr. Truman R. Temple, a library system exceptionally well organized and developed and a corps of library assistants enthusiastic, efficient and devoted to the institution they serve. It is a distinct pleasure for me in beginning my report to offer this testimonial to his executive ability and qualities of leadership.

Before commenting on the work that has been accomplished during the year, I wish to say that I have given much thought and study to the present situation of the library in relation to the community or communities it serves. The Thomas Crane Public Library has its main building and at the beginning of 1927 ten branches, the largest number of branches of any library in the state except Boston Public Library. It has a hospital service and maintains classroom libraries in every elementary school building. There are still one or two districts of the city at a considerable distance from the main library or any branch. A local branch in these communities would undoubtedly be welcomed and reach people who make very little use of the public library at the present time.

But the chief and most pressing need of this library is more books, in other words, the library has grown faster externally than internally. From examining the reports of a considerable number of libraries, I find their average circulation per book to be four times; our average is just one-tenth less than seven times. Gratifying as such a large turnover is, it would be more so if we were meeting the demand for books, but we are not. We must admit that the many complaints of borrowers that they can never find the books they want are too often justified. Judging from the average appearance of our new fiction bookcase at the main library, one could almost say we buy almost no new fiction. Yet we purchased over 400 new books with a total of 2479 copies in this class alone last year. It requires twelve copies at a total cost of about \$20 to supply the main library, each branch and the hospital service with one new book, and for \$100 we add only five new novels to the library. This indicates our problem in terms of money. Our non-fiction collection, which is after all the backbone of the library, is weaker than it should be. Many excellent books have been added the past year, but we are often unable to supply the individual book asked for and do not adequately meet the demands of students, scholars and those reading for education and culture. While our rule is to purchase any books asked for, the point is that we should have these books on the shelves in advance of the request. Our present stock of books numbers 67,228 and I do not know of another library in the country having a circulation as large as that of this library which does not have a book collection of over 100,000.

I do not intend to be pessimistic. I believe this library to be functioning efficiently and serving a widely scattered community far better than most libraries with similar problems. The demands

for books are legitimate demands and the problem is not administrative but one of money. The only remedy if the library is to furnish a more satisfactory book service is a moderate but steady increase in the book appropriation each year.

To adequately carry on the present library system with its new Montclair Branch, one additional assistant is a necessity. As an example of economical administration, the following comparison with the libraries in the two cities in Greater Boston nearest in size to Quincy is submitted. In 1925, one of these libraries had nine branches, a book stock of 120,802, circulated 490,409 books and had 29 assistants; the other had two branches, 80,253 books, a circulation of 331,510 and 20 assistants. In 1926 Quincy had nine branches, 67,228 books, its circulation was 467,190 and we had *13 assistants*.

To turn to the work of the year, the home use of books from all agencies during the past year was as above stated 467,190, a gain of 32,448 over any previous year in the history of the library. As will be noted in the statistical columns at the end of this report, all the branches but one showed substantial gains, the most noteworthy increases being at the Atlantic and the Parker Branch at Norfolk Downs, each of which gained 30 per cent above their circulation for 1925. Our per capita circulation for the whole city was 7.77 while the average for all the cities in the United States over 50,000 in population was 3.56. Our unit cost per volume circulated was \$.089 against an average of \$.155, which also proves the point of economy in administration.

The annual reports of my predecessor show that the residents of the Montclair district have for some years desired a branch library in their section and that plans for such a branch have been given serious consideration by your Board. Early in the winter a committee from the Montclair Improvement Association brought before the trustees a practical scheme for combining in one building a community house and a branch library, the building to be erected by the Association and the Thomas Crane Public Library to pay a reasonable rental for the library. The plan seemed a satisfactory solution of the problem of location and was agreed upon. The building was completed in October but owing to unavoidable delays it was not possible to open the branch until Jan. 5, 1927. I cannot speak too highly of the co-operation given the project by the officers and committee of the Montclair Improvement Association. All suggestions as to size, layout, lighting and other details made by the librarian were followed without alteration. The branch has been furnished with new modern library equipment and is a model small branch library.

In the fall of 1925 library service was established at the City Hospital. It is a satisfaction to record that the work has grown in usefulness during the past year, 5,468 books being loaned to patients and nurses, but it is even more gratifying to report that doctors and nurses pay tribute to the quality of the service, the comfort it affords individual patients and its value in the general morale of the hospital.

The work with children and with the schools of Quincy should receive some mention in this report. The circulation of books from the Children's Room at the main library showed a satisfactory gain of 4,325 over the figures of 1925. This is not, of course, the extent of our service to the children of our city as all the branches main-

tain collections of children's books which enjoy wide popularity and render effective educational service. Miss Kingman, Children's Librarian, who also has charge of the classroom libraries, has sent out over 140 of these libraries to the elementary schools of Quincy. Each individual classroom library is changed twice a year and Miss Kingman has visited every room at least once in two months to count circulation and consult with teachers about their lists. The circulation from these school libraries has nearly doubled in two years and more teachers are asking for them. The combination of administering both the children's work and the school libraries has become too much of a burden for one person to handle with the very limited amount of assistance we have been able to spare from our small staff. It is my plan if we secure another assistant to allot the major part of her time to assisting Miss Kingman in both branches of her work.

The branch buildings are all in fairly good condition physically and should not require much expended on them this coming year. Last summer the walls and ceilings of the Atlantic Branch were washed and repainted and new lighting fixtures installed. Additional shelving was placed in the Atlantic, Manet and Squantum branches. The piping layout at the Wollaston Branch was changed over with very satisfactory results in heating efficiency. I should like to call your attention to the fact that the fast increasing use of the Parker Branch at Norfolk Downs indicates that the present quarters in the basement of the Parker School will soon be outgrown and that within a year or two we should begin to look about for a more suitable location with more room for shelving and reading tables.

The quarterly bulletin of new books has been continued and the attempt made to include more descriptive notes on the books listed and to add news items of interest. We have secured its admission as second class matter and it can now be mailed to any resident of Quincy for one cent a copy. Under the headings "Over the Library Desk" and "Library Notes," we tried more or less regularly to furnish to the local papers a column of book comment and library news. I desire here to record my appreciation of the co-operation of both local papers in giving generous space to items concerning the library and its work.

There have been a few changes in the personnel of the staff. Miss Margaret Thompson who came in 1925 to organize the hospital library service, resigned in May to join her family in Europe. The position was filled by the appointment of Mrs. Zayma Connolly, previously librarian at the Temple Branch, who is successfully carrying on the work. The vacancy caused by the lamented death of Miss Charlotte Barstow was filled by the appointment of Mrs. Martha Rosvall who had some years ago served as librarian of the branch at Quincy Point. In the fall we were glad to welcome back as a member of the staff Miss Louise Warren who had resigned the previous year to go to Florida. In July Miss Viola Dunkerley who while not technically a member of the staff had regularly performed the duties of an assistant for more than a year, was married and resigned her position. In her place we secured Miss Phoebe Lindberg who has been given charge of the Temple Branch at Quincy Point.

I can testify to the efficient manner in which the library was administered by Miss Callahan as acting librarian during the month of January and especially am I grateful for her invaluable help

while I was becoming acclimated to a new position and which she has rendered throughout the year. I am also deeply appreciative of the genuinely fine spirit with which the whole staff accepted a change in administration and for their loyalty to me and devotion to the interests of the library. It is also a pleasure to pay tribute to the cordiality of the people of Quincy with whom I have come in contact.

Lastly, let me thank you as a board and individually for the confidence manifested in my appointment and for the whole-hearted support and assistance given me during the year. I am sure that few boards of trustees have given more generously of their time and thought to the consideration of the problems of the institution they serve.

Respectfully submitted,

GALEN W. HILL,
Librarian.

Statistical Summary

Population served 60,811 (Census of 1925)

Free for lending and reference.

REPORT OF CITY CLERK

I have the honor to submit the thirty-eighth annual report of this department, being for the year ending December 31, 1926.

Receipts

Junk licenses	\$280 00
Amusement licenses	2,812 00
Common victualler's licenses	585 00
Express and carriage licenses.....	57 00
Pool and billiard licenses	640 00
Auctioneers' licenses	12 00
Druggist licenses	13 00
All other licenses	2,825 50
Marriage permits	615 00
Recording and special	918 25
	<hr/>
	\$8,757 75

The above sum has been paid to the City Treasurer.

Number of marriage intentions recorded in 1926.....	624
Number of marriages recorded in 1926	678
Number of births recorded in 1926	1420
Number of deaths recorded in 1926	688

The number of dogs licensed in 1926 was 1335 male, 236 female, 259 spayed, and 3 breeders' licenses, for which the sum of \$4468.00 was collected. The sum of \$4101.40 was paid to the County Treasurer and \$366.60 to the City Treasurer. The sum of \$2172.25 was collected for hunting licenses. The fees amounting to \$240.30 was paid to the City Treasurer and the balance to the Commonwealth. Annexed are the births, marriages and deaths recorded in Quincy in 1926 and the Election reports.

EMERY L. CRANE,
City Clerk.

REPORT OF SCHOOL COMMITTEE

To the Citizens of Quincy:

Your School Committee submit herewith for your consideration their report for the year 1926.

The year just closed has been an eventful one in school matters, and one which has called for much time and attention on the part of your Committee, more probably than any previous year in the history of the city.

Our school system suffered a very great loss during the year in the death of our Superintendent, Mr. Fred H. Nickerson, who had served the city ably and faithfully since December 20, 1920. Mr. Nickerson passed away October 17, 1926. Coming as it did, without warning, his death was a great shock not only to those with whom he was closely associated in his work, but to the citizens of the entire city, for during his service here, he had become loved for his genial personality, and greatly esteemed for his ability.

After very carefully investigating the qualifications and experience of the many candidates for the position made vacant by the death of Mr. Nickerson, your Committee selected Mr. James N. Muir, of Bethlehem, Pennsylvania, who will, we believe, advance still further the already high standing of Quincy's schools. Mr. Muir will take up his work early in January, 1927.

The two outstanding problems before your Committee this year were the further extension of the Junior High School system, and the housing of pupils in nearly every section of our rapidly growing city.

Work on the North Junior High School has progressed steadily during the year, and we are assured that this building will be ready for occupancy the semester beginning in February, and such has been the rapid growth of population in that section of the city that indications are that the building will be filled at once.

Recognizing the urgent need of completing this system as soon as possible, your Committee urged the erection of the South Junior High School on the so-called Nightingale lot, and our Mayor and Chairman, Mr. Barbour, petitioned the Legislature for permission to borrow outside the debt limit, in order that the building might be started at once. This permission was granted, and the building is now perhaps 40 per cent completed, and it is hoped can be occupied in September, 1927. Shepard and Stearns of Boston are the architects.

The completion of the North Junior High will relieve the congestion in our buildings somewhat, as will the South Junior, but after all we are barely keeping pace with the growth of the city, and it will be imperative to get another building under way at once. With that end in view, a sub-committee is now at work on a study of conditions to determine just what building is most necessary. It is significant to note that the present increase in our school population calls for the erection of a twenty room building each year, or its equivalent in addition to existing buildings.

During the year it became necessary, also, for the city to take over what has been known as the Government School at Quincy

Point, this taking being in accordance with an agreement entered into between the United States Government and the City of Quincy when the building was erected during the World War. The building has been put in thorough repair, turned over to the School Department, and renamed the Thomas B. Pollard School, in memory of the former master of the Daniel Webster School, who passed away in 1925, after a service in our schools of thirty-eight years.

Though a part of Faxon Field has been graded through the generosity of Mr. Henry M. Faxon, the donor of the Field, your Committee point out the urgent need of filling and grading the rest of the tract as soon as possible, in order that it may be available as a playground for the pupils of the High and Coddington Schools as well as for all children living near the center of the city.

This year we have lost by death, Mr. Louis Fleshman, who passed away January 2, 1926, after a faithful service of eight years as janitor of the Massachusetts Fields School.

Detailed reports of the Acting Superintendent and various heads of departments follow, giving very interesting data and statistics.

The foregoing report was prepared by a special committee consisting of Dr. Daniel B. Reardon and Col. Warren E. Sweetser, and was adopted as the annual report of the Committee for the year 1926.

The following Resolution was adopted by the School Committee on October 21, 1926:

The School Committee of the City of Quincy learns with deep regret of the death of Fred H. Nickerson, who for six years has served as Superintendent of Schools and Secretary of this Committee.

Mr. Nickerson was a Christian gentleman who exemplified by his thoughts and deeds the high ideals for which he toiled.

He was a superior executive and elevated the schools of Quincy to a high level by the most modern of methods. He was an arduous and tireless worker and gave his life to his work as truly as any soldier on the field of battle.

The Committee wishes to record the respect and regard in which it held Mr. Nickerson and the profound feeling of loss to the schools and to the community in his sudden death.

IN MEMORIAM

FRED H. NICKERSON

Superintendent of Schools in
Quincy since December, 1920
Born July 24, 1863
Died October 17, 1926

LEWIS FLESHMAN

Janitor of Massachusetts Fields
School since August, 1918
Born July 27, 1865
Died January 2, 1926

REPORT OF THE ACTING SUPERINTENDENT OF SCHOOLS

To the School Committee of Quincy:

The following report presents briefly such facts and discussions with regard to activities of the schools during the past year as are necessary to enable the reader to form an intelligent judgment regarding the value of the work done.

We have tried to express our appreciation of the work of the late Mr. Nickerson, under whose leadership the work of the year was carried on, by presenting those facts which we feel sure he would have discussed with you. You will realize, however, the difficulty of presenting such a report when no one individual has followed closely all branches of the work throughout the year.

Enrollment and Attendance

During the school year ending in June, 1926, there were 12,369 different pupils enrolled in the regular public day schools of Quincy, or 590 more children than were enrolled the previous year, an increase of 5 per cent. While the school population of Quincy increased 5 per cent, the school population for the state increased only 7/10 per cent.

The rate of increase has been quite constant for several years, resulting in overcrowded conditions in the schools. During the year the average number of pupils per teacher in the elementary schools was 39, the highest since 1916.

The completion of the North Junior High School and the South Junior High School will relieve the overcrowded conditions in these sections, but the rapid growth of the school population indicates that for several years the proper housing of pupils will be a difficult problem.

The average daily attendance of pupils during the past school year was 94.4 per cent, which is 1.1 per cent higher than the per cent of attendance for the state as a whole. To find a per cent of attendance as good, or better, it was necessary to go back twenty-five years. In 1901 the per cent of attendance was 96.3 per cent.

The steady increase in the enrollment of our schools, with a good per cent of attendance, shows that the work done in the schools is appreciated, for parents will not send their children regularly to the public schools if they are dissatisfied with the type of instruction offered.

School Costs

The total expenditures for the support of our Public Day, Evening, Vacation, and Summer Schools, i. e., the expenditures for all purposes connected with these schools, excepting new buildings, alterations, and permanent repairs, for the school year ending June 30, 1926, was \$797,539.86. Based on the average membership of the schools for that year, this was an average expenditure of \$71.21 per pupil, which is 18c less than the corresponding cost for 1925. The average per pupil cost for the state at large was \$89.98, and for the other 38 cities of Massachusetts \$90.45. While the

cost per pupil in Quincy was slightly less than that of the previous year, the average per pupil cost for the other 38 cities increased 7/10 per cent, and the average per pupil cost for the state as a whole increased 2.3 per cent.

Other facts in regard to per capita costs are shown in the following tabulation:

Itemized Cost Per Pupil for Support of Public Schools (Day, Evening, Summer) for the School Year ending with June, 1926

[Based on the Average Membership of the Schools]

Items	Average per Capita Ex- penditure for Quincy	Average per Capita Ex- penditure for 38 Other Cities	Average per Capita Ex- penditure for the State
Instruction	\$52 94	\$65 53	\$65 22
Administration	1 62	3 10	3 07
Textbooks and Supplies for Instruction	4 46	4 24	4 25
Operation of School Plant.....	5 92	9 74	9 64
Maintenance of School Plant..	3 50	5 54	5 49
Miscellaneous	2 77	2 30	2 31
Totals	\$71 21	\$90 45	\$89 98

Had Quincy expended as much per pupil as the State as a whole, our school budget would have been larger than it was by \$210,-205.23; and if as much had been expended as the similar average for the 38 other cities of the State, our school budget would have been increased by \$215,468.76.

Quincy's per capita cost for instruction was noticeably lower than the average of the other cities. As Quincy paid salaries to teachers higher than the average paid in the other cities of the State, the low cost of instruction is due to other causes.

In Quincy there are more pupils per teacher than is customary elsewhere in the State. Most school committees are seeking to reduce the number of pupils per teacher. The figures of Table 12, Appendix B, show that in Quincy the number of pupils per teacher has been increasing. Although the average number of pupils per teacher was 39, there were in June, 1926, thirty-eight rooms with from 45 to 49 pupils and fourteen rooms with 50 or more pupils. The individual child suffers under such conditions. The crowded condition of the schoolroom should be remembered when interpreting the per capita cost for instruction. The new Junior High Schools will help relieve the overcrowded conditions, but the pupil cost of instruction will tend to increase as the average number of pupils per teacher is reduced.

From the above table it is evident that Quincy is not extravagant in the expenditure of school money as compared with other places. On the other hand a true comparison is not possible through sta-

tistics alone, as there is no way of securing comparative returns showing results accomplished through the expenditure. In fact, at present no way has been devised to measure the growth in social efficiency of the pupils being educated. Without such facts, no accurate comparisons based on expenditures can be made.

The following facts given in the last Annual Report of the Department of Education are worthy of attention:

	Quincy's rank among the 39 cities of Massa- chusetts	Quincy's rank among the 355 cities and towns of the Commonwealth
Valuation of 1925 per pupil in net average membership year ending June 30, 1926....	12	81
Expenditure for school sup- port from local taxation fis- cal year 1925, \$1,000 valu- year ending June 30, 1926.. ation	38	326
Per capita cost for sup- port of public schools } fiscal year 1925.....	From } a. local } taxation } From } b. all } sources }	223 312

Compared with the other cities and towns of the Commonwealth, the above figures indicate that Quincy's ability to support education is above the average. In the amount raised for school support from local taxation per \$1,000 of valuation and in the per capita expenditure for education, Quincy is far below the average. Either the school department was run with great efficiency or Quincy is not giving the same educational opportunities that are offered in other Massachusetts communities. Even if the educational offering of the city does compare favorably with that of other cities, the idea suggested by Mr. Nickerson in his last school report is worthy of careful consideration: "The facts suggest the question whether the best interests of the city may not justify a larger expenditure than we are now making for the education of our young people, upon whom the future welfare of the community depends to a large degree."

Elementary Schools

The details for this branch of the school work will be found in the reports of Miss Helen Maude Dellicker, Supervisor of Grammar Methods, and of Miss Elsa Schoshusen, Supervisor of Primary Methods, in Appendix A.

It has been evident for a long time that the courses of study in use in this department needed revising. Plans to bring about better courses of study in all elementary school subjects were perfected early in 1926. Believing those courses are best which the room teacher helps prepare, a large part of the elementary school force was enlisted in the work. The teachers were divided into

three large groups: those from grades 1 and 2 formed one group, grades 3 and 4 a second group, and grades 5 and 6 a third group, each under the direction of a general chairman. These groups in turn subdivided to work out courses in various subjects. The leaders of the sub groups held frequent meetings in order to keep the work unified. Shortly before Mr. Nickerson's death, tentative courses for the elementary grades were ready in English, Arithmetic, Geography, History, Reading, Health, Ethics, Civics, and Nature Study.

These courses were to be thoroughly discussed and revised by a central committee. Mr. Nickerson's untimely death has prevented the completion of this important piece of work. It is our hope that it may be finished so that the teachers may try out the new courses in the schoolroom.

Junior High Schools

Quincy is in a difficult period of transition from the traditional system of eight years of elementary education and four years of high school education to six years of elementary education, three years of junior high school education, and three years of senior high school education.

It has been impossible to adopt a real junior high school program for lack of suitable housing facilities adapted to progressive methods of education. Much progress was made during the year in the building program. The completion of the North Junior High School early in 1927 and of the South Junior High School in September, 1927, will give the city three junior high school centers, providing for all the city except the Quincy Point section. To properly serve the best educational interests of the city a junior high school building in the Quincy Point section is most essential.

The Central Junior High could not be organized on a complete junior high basis because of overcrowded conditions in the elementary schools and senior high school, which made it impossible to accommodate the seventh grade pupils in the Central Junior building.

The completion of the junior high plan still remains a most important work before the School Committee.

The Senior High School

Detailed information about this school is given in the following report of its headmaster and in the statistical tables in Appendix B.

The figures for enrollment and membership in this school and the comment thereon by Mr. Collins are very significant.

Most careful thought must be given to the proper housing of the pupils who wish to avail themselves of the educational opportunities in the Senior High School.

REPORT OF HEAD MASTER OF HIGH SCHOOL

MR. ALBERT H. COCHRANE, *Acting Superintendent of Schools:*

Dear Mr. Cochrane:

I have the honor to hand you my report for the Senior High School. Comparative statistics of enrollment and membership for recent years is as follows:

	1924	1925	1926
Number enrolled	1,389	1,395	1,524
Membership at date.....	1,318	1,349	1,480

These figures will show that there has been an unusually large increase in membership this year. This fact has made the problem of accommodation of classes a difficult one to solve. We are now using every class room in the building every period during the week, conducting classes on the stage of the auditorium and using the cafeteria so far as possible for a study room. Eight teachers have no permanent room but instead travel about the building occupying rooms which happen not to have classes at the time. The use of one of the rooms originally assigned to the Continuation School will help a little during the second semester, but I am compelled to say that in a very short time the school must again be conducted on the two platoon basis. The question may be asked why so new a building is so soon overcrowded. The answer is that the building was designed to care for 1,500 pupils at the outside and the figures given show that that number has now been reached. In considering the building, it should also be kept in mind that the rear part houses about 200 pupils of the Industrial School who are not included in the numbers given above.

Perhaps the most important accomplishment in the school for the year has been the establishment of the position of dean of girls. Many cities have such a position and it was strongly urged for Quincy by the City Federation of Women's Clubs. After careful consideration, the School Committee voted to make such provision for our school, and appointed Miss Josephine D. Baker to serve as dean. Miss Baker entered upon her work with great enthusiasm and immediately gave evidence that the School Committee had been wise in its action. Limited space will allow opportunity to give only a few details of her work. She teaches two classes a day in English so she may have intimate contact with classroom work. Much of the remainder of her time is given to helping the girls as an adviser in connection with health matters, employment, curriculum adjustment and vocational guidance. She has charge of all social affairs of the school and also of the various forms of student participation in school government. Visits to homes of some of the girls have helped to solve the problem of poor attendance and low scholarship. A Big Sister Club has been organized by the dean to welcome girls entering the school for the first time and help them to become quickly adjusted to their work in the school. Mothers are finding the dean a sympathetic and wise person with whom they can discuss satisfactorily the problem of their daughters. In a word the work of our dean is to help girls to adjust themselves as soon as possible to their environment and to try to keep them well, happy and industrious.

I have thus far failed to express appreciation to the Wollaston Woman's Club for the magnificent work it is doing in providing scholarships for girls of our graduating classes who enter college. For several years substantial financial aid has been given to girls during their first year in college. One scholarship is given each year to a girl residing in Wollaston and another to a girl residing in any other part of the city. Awards are made by a committee of the Club after careful investigation of the merits of the girls who apply for the scholarships. Last June scholarships were awarded to Lucy W. Marr of the class of June, 1926, who entered Boston University, and Ethel M. Pierce of the class of February, 1926, who entered Wheaton College.

Last June, for the first time, the Quincy Women's Club also offered a scholarship for a young woman graduate, thus enlarging the good work already started by the Wollaston Club. The first Quincy Club scholarship was given to Margaret L. Marr of the class of February, 1925, who is attending Radcliffe College. In addition to these, for several years the Rotary Club has maintained a scholarship, which has been awarded to Ermanno A. Basilio of the class of February, 1924, who attends the Massachusetts Institute of Technology. Recently, also, scholarships were given by Mr. and Mrs. W. G. Shaw and by the class of 1918. All these scholarships have been wisely awarded and have been of real assistance to worthy young people seeking a higher education.

In previous reports I have mentioned the various musical organizations of the school and have called attention to the great interest in them shown by the pupils and to the commendation they have received because of the excellence of their work. Special evidence of these was shown last May when at the Music Conclave in Boston our orchestra received a cup as first prize for excellence of performance and our band received first prize for best appearance in parade. All these organizations are in such constant demand about the city that we have felt compelled to limit them to only a few performances not school affairs so that too much attention may not be taken from the regular studies.

We must constantly call attention of parents to the fact that requirements for admission to normal schools and colleges continue to become more comprehensive and more exacting. Each year brings changes and usually a heavier load for the pupils to carry. Almost every higher institution now frankly states that it is looking for students with superior mental ability and with wide interests of a worthwhile sort. We have, nevertheless, been successful in preparing a considerable number of pupils for college, and it is a source of great pride to us to be able to say that our recent graduates who are attending higher institutions still continue to maintain most creditable standing and uphold the enviable reputation for excellent preparation which our school has among colleges and higher institutions of learning.

In closing, may I be allowed to express to the School Committee our deep appreciation of the trust they have reposed in us and the loyal support we have always had from them.

Respectfully submitted,

ERNEST L. COLLINS.

The Academic Evening Schools

Registration for evening academic work reached a total of 473, an increase of 28 per cent over the previous year. The following tabulations shows the enrollment by subjects for the past four years. As in the past, the largest number of evening students are interested in commercial subjects. The number seeking such work has remained more constant in this field. The increase in registration is largely in the subjects more recently introduced.

Subjects	1923	1924	1925	1926
Bookkeeping	66	86	82	83
Business arithmetic	80	90	100	92
Business English	111	164	178	128
Penmanship	81	54	96	55
Elementary stenography	105	186	166	165
Advanced stenography	24
Typewriting	164	182	235	215
Mechanical drawing	75	182	87	92
Grammar School subjects	23	18	11	23
Algebra	13	49
Cultural English	48

For the first time a class in advanced stenography was opened and continued through the evening school term. The enrollment in algebra and English classes indicates a growing desire for the more cultural types of education. Six students desired instruction in general science, which was not sufficient to form a class. I thoroughly believe, however, that each fall opportunity should be offered in new types of work so that adults who desire further education may have their needs satisfied. It is a slow process but one well worth the money and effort.

Ever since Evening School work has been carried on there has been a heavy falling off in the attendance of classes after the first few weeks. Apparently many enroll out of curiosity but with no strong desire for the education which can only be had through real work. I believe the registration fee of \$1.00 should be increased. Since the fee is returned at the close of the session, it would mean but a small sacrifice to the serious minded young person and would help to keep out the frivolous who really hinder the best work of the school. To raise the registration fee would require an act of the Legislature, but I believe it is worth serious consideration.

Certificates were awarded to twenty-two students who had completed two years' work in the same subjects.

Mr. Charles Thomson and his corps of evening school teachers are to be commended for the interest which they take in the individual pupils. Evening school attendance increases from year to year only when the teachers are meeting the needs of the students.

The Academic Summer School

Below are given the most important statistics concerning the summer school for the last six years. It is interesting to note that

while the total enrollment and average membership for the summer of 1926 were the largest in the history of the summer school, the total cost and cost per pupil were the smallest since 1923. The total cost was reduced by not including a charge for administration. Adding the same administration charge as last year the total cost becomes \$2,335.98, and cost per pupil \$5.75, the cost per pupil still remaining the lowest of any for the last three years.

The following tabulation shows interesting comparative data on this branch of our school endeavor covering the six years of its existence:

DATA ON ACADEMIC SUMMER SCHOOL

Grades	Year	Total Enrollment	Average Membership	Per Cent Daily Attendance	Total Cost	Cost per Pupil
VB to VIIIA inclusive	1921	391	334.84	92.61	\$1,425 08	\$4 26
	1922	417	364.52	91.60	\$1,598 25	\$4 38
	1923	361	296.43	93.35	\$1,517 06	\$5 11
	1924	405	340.40	95.60	\$2,187 82	\$6 42
	1925	375	334.40	97.90	\$2,153 99	\$6 44
	1926	465	406.59	96.97	\$2,141 55	\$5 27

Of the pupils enrolled, 344 were trying to win lost promotions: of these 48, or 13.95 per cent, were dropped or withdrew before the end of the term; 44, or 12.79 per cent, failed to gain promotion, and 252, or 73.25 per cent, were successful. One hundred were trying to remove conditions. Of that number 16 per cent were dropped before the end of the session, 12 per cent failed, and 72 per cent were successful.

Interpreting the figures as in past years on the basis of the number who remained the entire term, 85.1 per cent were successful in gaining lost promotions, and 85.7 per cent were successful in removing conditions.

Sixteen pupils were trying to gain a diploma of which number 10, or 62½ per cent, were successful.

By comparison with figures of other years it will be noted that the percentage of pupils who were successful in summer school the past summer is nearly 10 per cent less than that of other years. That reduction is not the result of chance or of poor teaching. By studying the results of summer school work of 1925 it was found that while 95 per cent of the pupils were successful in winning promotions, only 66¾ per cent maintained a passing standard in the regular day school during the next half year. Bearing that fact in mind the summer school force tried to study the situation more carefully.

The Stanford Achievement Test was given to all summer school pupils in the subjects in which they had failed and in reading. The most interesting fact the test revealed was the poor reading ability of the pupils which undoubtedly accounted for their poor work in history, geography and arithmetic problem work during the regular year.

Special attention was given to the teaching of silent reading, and

only those pupils were promoted who showed satisfactory progress in that respect. It seemed useless to send a pupil into the eighth grade, for example, who could only read on a par with most pupils of the sixth grade. The summer school teachers and principals are unanimous in their belief that in the future summer school work should be limited to arithmetic and English, with the latter subject divided into oral and written English, spelling and reading according to the needs of the child.

During the past summer the enrollment of pupils seeking to gain lost promotion was so heavy that in many grades no pupils seeking to remove conditions could be accommodated. This was particularly true of the fifth and sixth grades. In view of the fact that nearly one-third of these conditioned pupils fail to gain promotion the following year, the city would save money by providing enough additional teachers in the summer school to care for all conditioned pupils who care to attend. As it is now, when there is room for but few of the conditioned pupils, it is very difficult to make a fair selection of those who may attend.

Special Classes

In 1919 the State Legislature passed a law which went into effect in 1920, requiring each community in Massachusetts to annually ascertain the number of children three or more years retarded in mental development in attendance upon its public schools, and to establish special classes for instruction where there are ten or more such children in the town or city.

Quincy has complied with the first part of the law, but, owing to overcrowded conditions of the schools, no classes were established until recently. In February, two special classes were formed for mentally retarded pupils,—one at the Thomas B. Pollard School and the other at the Adams School. These classes have been limited to sixteen pupils under the direction of teachers specially trained for the work with several years of experience teaching backward pupils.

In the spring and fall of 1926 two hundred and thirteen children thought to be retarded in mental development were examined. The children were selected by the masters and teachers using one or all of the following methods:

1. Selecting by reference to individual school records those pupils who have repeated two or more years' work.
2. Selecting those who, failing to earn promotion two or more years, had been allowed by school officials to advance with their grades as being for their best interests.
3. Selecting those who by an age grade table are shown to be retarded in their school work two or more years.

The children so selected were thoroughly examined in the following fields: Family history; personal and developmental history; school progress; social history and reactions; moral reactions; examination of school work; physical examination; mental examination. The records in the first five fields were obtained by the school nurses who talked with each child, the various class room teachers who had taught the child, visited the homes and talked with parents and relatives of each child. The examination in school work was given by one of the supervisors or the assistant superintendent. Dr. Patterson, of Wrentham State School for the Feeble

Minded, or her assistant, gave the physical and mental examinations.

With all data before her, Dr. Patterson diagnosed each case and made a report to the School Department with a recommendation for the proper placing of each child.

The survey showed that we have in our schools 112 children who are now three or more years mentally retarded and that 52 more children would be three or more years retarded when they became fourteen years of age. Dr. Patterson recommended 49 children for placement in low special classes, 94 for over age groups and 10 for institutional care.

To properly educate the retarded pupils the city needs at least three low special classes and six or seven over age classes. The Daniel Webster, John Hancock, Lincoln and Willard Schools should have classes for mentally retarded pupils at the earliest possible moment because of the large number of retarded children in those buildings. At present there are no rooms available for classes, but it is hoped that the opening of the new Junior High Schools will release some rooms, now used for regular classes, that they may be used to conduct classes for the mentally retarded pupils.

State-Aided Activities

The forms of education included under State-aided activities are of such a nature that few communities could maintain them if forced to support them by local taxation alone. The State reimburses the city approximately one-half of the net maintenance cost of these schools. Since the State contributes so liberally to such education it reserves the right to supervise the instruction and formulate many of the regulations under which the State-aided schools are maintained. The nature of the work, which is largely vocational, makes it essential that classes be small, and the State requires that all shop classes be limited to not more than sixteen pupils per teacher. This requirement alone doubles the cost of instruction as compared with elementary schools.

1. *Day Industrial School.*

The growth of the Industrial School is clearly shown by the following tabulation:

Year	1921- '22	1922- '23	1923- '24	1924- '25*	1925- '26
Auto mechanics	17	30
Electrical	32	33	39	40	36
Machine	31	32	33	42	37
Plumbing	18	21	18	42	37
Sheet metal	18	18	20	16	18
Woodworking	48	60	75	70	70
Total	147	164	185	227	228

*Entered New Building.

The Auto Mechanics department, opened in February, 1925, has grown so rapidly that another teacher was needed in February, 1926. From now on the enrollment figures will show little change because the school has reached its capacity, except in the Sheet Metal department and possibly the Machine Shop department. About sixteen more boys could be cared for in the Sheet Metal department and the same number in the Machine Shop. At present the machine trade is oversupplied with workers and it is not reasonable to suppose that the demand for machine shop practice will increase to any extent for the next ten years. All the other departments are full with a waiting list of applicants, and there is no room for expansion within the present building. Careful thought should be given to the future needs of this school so that the city may meet the increasing demand for trade training.

For this school \$44,122.21 was paid out of the city treasury, but it is well to know that the treasury will receive the following money because of the Industrial School:

Aid from the State	\$17,316 59
Aid from Federal Government	2,755 11
Cash received for labor and products.....	1,430 13
Cash received for tuition pupils.....	4,095 00
<hr/>	
Total receipts	\$25,596 83

While it actually cost \$241.25 to educate each boy in the school it cost the city only \$101.29, less than half the total cost. Furthermore, the boys in this school do much of the electrical and plumbing repair work necessary to be done in all the public schools of the city, and the other departments make many things for use in the schools that would otherwise be purchased from other funds. During the year the Industrial School boys did work for the School Department of which the labor alone was worth \$3,531.54. It is necessary that the boys do such work to get a proper trade training, but if it were not for this school the maintenance and supply accounts would be many dollars higher.

2. *Home Making School for Girls.*

In 1925-26 the average membership of this school was 41.86, an increase of seven over the average membership for the previous school year. The school can and should serve a larger number of girls. If the value of the training given was better understood by the general public, I feel that the school membership would rapidly increase.

I invite your attention to the following statements by the director of the school, Miss Caroline Wilson:

"The school does not aim to fit girls specifically for any trade, but does give them enough of a foundation in dressmaking, millinery, nursing, foods, and dietetics to enable them to find their special interests and aptitudes. From here they are ready to go on in their special field, getting the additional trade training they need if they desire to enter the business world.

"We might say that the Home Making School offers more of a professional training than a trade training, as we are thinking of these girls as future home-makers, and not so much as wage-earners. Our reports show that a large number of our girls marry very soon after leaving school, or in many cases have the responsibility of their parents' home.

"A new feature of the school started within the past year is the organization of several clubs. The girls gain a great deal in social, moral and civic development from these club groups, which would be very hard to duplicate in classroom work."

The installation of an instantaneous gas hot water heater made it possible to remove all coal from the cellar and tear down the coal bins. Fifty steel lockers not used in the Industrial School were installed and the girls now have a more adequate place for storage of wraps, etc.

It is not generally known that more than half of the money appropriated for this school is turned back into the city treasury. During the fiscal year of 1926, \$12,464.16 was spent, but the school is responsible for the following receipts:

State aid	\$3,890 96
Federal aid	668 54
Tuition	570 00
Cash received for work and products.....	1,235 57
Miscellaneous	5 83
	<hr/>
	\$6,370 90

The net cost of the school is thus reduced to \$6,013.65, making the cost to educate each pupil \$110.08, which is about the cost to educate a pupil in the Senior High School.

There is a splendid spirit of co-operation in the school due to the untiring efforts of the teachers under skilful leadership of Miss Wilson.

3. Continuation School.

Previous to 1920, before the Continuation School system went into effect in Quincy, over 200 children between 14 and 16 years of age were leaving school every year to go to work. Many of these minors worked only a short time and then spent a large part of several years in idleness. This loophole in the old school laws has been closed through definite supervision of the working minors by the Continuation School. Furthermore, the fact that employed minors under sixteen must attend school for four hours a day has tended to reduce the number of such children so employed.

In 1925 a committee from the Associated Industries of Massachusetts made a thorough survey of the Continuation School system throughout the State. This committee reported that the Continuation School was well worth while. The report contained this interesting paragraph: "Although the Continuation School is in the form of a vocational enterprise, its primary objects are those of vocational guidance, culture and citizenship. This is the marginal group of children. They left school for lack of interest or in search of wages. Few of them have any vision of what they want to do in life. In four hours a week over two years the school authorities cannot both find out what the individual can do best and proceed to train him. The vocational equipment serves as a background which catches the individual's interest and against which his abilities are played up."

The work of the boys has continued to be along the same practical lines as of the past few years. In addition to the household arts work for girls, which is conducted with marked success, ele-

mentary commercial work has been started for those girls who will benefit by such instruction.

It has been apparent for some time that our Continuation School membership is diminishing in number rather than increasing. All directly concerned with the school feel that one man could handle all of the boys' work and supervise the girls' work. Steps are being taken toward that end.

CONTINUATION SCHOOL ENROLLMENT

1920-1926 inclusive

	1919-'20	1920-'21	1921-'22	1922-'23	1923-'24	1924-'25	1925-'26
Boys	104	136	62	77	71	127	67
Girls	35	53	36	27	28	50	26
Total	139	189	98	104	99	177	93

For the school year ending on June 30, 1926, the total expenses of this school were \$6,016.62. The city treasury will receive the following sums as a result of the school work:

From the State	\$2,697 90
From the Federal Government (Smith-Hughes Fund)	450 61
Miscellaneous	162 82
	<hr/>
	\$3,311 33

The net cost to the city was, therefore, only \$2,705.29.

4. *Evening Industrial School for Men.*

By State law three limitations are imposed upon applicants for State-aided evening trade extension courses: they must be over sixteen years of age; regularly employed; and admitted only to classes the subject matter of which relates to their regular employment.

During the season 1925-26, classes were maintained in Automobile Mechanics, Electrical Wiring, Machine Shop Practice, Machine Drawing and Shop Mathematics, Plumbing, Roof Framing, and Sheet Metal Drafting.

The class in Machine Drawing and Shop Mathematics was a new class opened in the Boston Gear Works with the co-operation of the management of that concern. The experiment was profitable and the idea has been taken up by the Bethlehem Shipbuilding Corporation.

The following tabulation shows interesting comparative data on Evening Industrial Work during the past four years. During the school year ending December, 1923, the classes were held in the old Industrial School on Phipps street. Since then most of the classes have been held in the new building of the Industrial School.

DATA ON EVENING INDUSTRIAL SCHOOL REGISTRATION

Class	1922-'23	1923-'24	1924-'25	1925-'26
Automobile Mechanics	No class	No class	No class	24
Electrical wiring	18	16	33	45
Drawing for Granite Cutters	No class	11	No class	No class
Machine Shop Practice.....	16	27	25	21
Machine Drawing and Shop Mathematics	No class	No class	No class	27
Plumbing	No class	No class	39	52
Roof Framing	No class	47	26	36
Sheet Metal Drafting.....	28	45	25	29
Totals	62	146	148	234

The registration for 1926 was 277 per cent greater than that for 1923 and 59.4 per cent greater than that of the preceding year, indicating that the classes fill a felt need.

A further analysis of the registration for 1926 shows that 37.6 per cent of the men were under twenty-one, while 62.4 per cent were over that age, 10.2 per cent were over thirty-five. This indicates that the large majority of those enrolling for trade work are young men yet old enough to have a serious purpose in life.

The classes in Electrical Wiring, Plumbing, Roof Framing, and Sheet Metal Drafting were held in two divisions for several weeks. Even then many applicants for Plumbing instruction were placed on a waiting list. Most of those enrolling in the Plumbing class wish to learn lead wiping of joints. When that is learned they usually drop out and their places are filled from the waiting list.

The classes are held for forty evenings, if the number attending warrant it. The classes in Sheet Metal Drafting, Machine Shop Practice, Machine Drawing and Shop Mathematics ran the full term. The Roof Framing, Electrical and Automobile Mechanics classes were discontinued on February 18, 1926, for lack of attendance.

5.—*Practical Arts Classes for Women.*

The aim of these classes is to educate the women to be better home makers and we are certain that in their homes a happier, more healthful atmosphere prevails.

The following table shows comparative data on enrollment for the last five years:

ENROLLMENT DATA

	1921-'22	1922-'23	1923-'24	1924-'25	1925-'26
Millinery	304	287	220	277	122
Cooking	15	34	42	85
Dressmaking	306	376	591	619	730
Home nursing....	17	19	12	17	...
Total	627	697	857	955	937

The growing interest of the women in cooking and dressmaking instruction is notable. The decline of attendance in millinery classes is due to the change in style,—the popularity of the felt hat has affected enrollment in millinery classes all over the State.

The monetary value of the work accomplished in the various classes is worth study.

Subject	Cost of Material	Market Value of Finished Product	Amount Saved by Women
Dressmaking	\$13,050 37	\$34,322 60	\$21,272 23
Millinery	1,709 09	4,963 00	3,253 91
Foods	227 56	317 50	89 94
Total	\$14,987 02	\$39,603 10	\$24,616 08

However, the value of these classes cannot be measured in dollars and cents for the women acquire worthwhile thrift habits, valuable skills and higher ideals of family and social life.

The supervisor reports as follows: "In the dressmaking classes the women are taught the texture of materials, tests in textures are demonstrated in the classes, and they are advised to purchase good materials and becoming patterns. The renovation units have been especially helpful. Garments and hats have been made over at a very small expense into up-to-date stylish creations.

"In the foods classes the pupils are taught the correct combinations and preparations of foods, serving, and table setting."

The supervisor of this work, Miss Nellie A. Perry, is doing the same conscientious work in this field that has been shown for several years in her Americanization work. The continued success of the Practical Arts Classes is assured by her supervision.

6. Americanization Classes.

Our aim is to make all the people of Quincy literate or as nearly literate as possible. This can be accomplished by the united efforts of all the citizens.

Thirty Americanization classes, enrolling 545 students, were conducted in the schools, factories, and club houses during the year.

Miss Perry says: "The pupils seemed to be of a superior type, anxious to learn English, to become acquainted with America and American ideals, to become upright American citizens taking their places in this country and contributing their share in a great democracy.

"There is a more vital understanding of the alien today; the interests and co-operation of the citizens and organizations grows greater year by year."

Miscellaneous

As one means of developing the habit of thrift in young people, a school saving system has been maintained in all our elementary schools and in the Central Junior High School since October, 1908.

During the past year the total number of different depositors was 7,457, which is an increase of 1,498 over the number for the previous year. The deposits for the year amounted to \$57,967.68. The schools are not primarily interested in the amount saved but in the number of children who deposit, and the regularity with which deposits are made.

In Quincy the last \$300 of a teacher's salary must be obtained through professional improvement work under proper guidance. To facilitate the work, courses for teachers are given in Quincy each year through the co-operative efforts of the Quincy Teachers' Association and the School Department. Many teachers are taking late afternoon, Saturday, and summer courses in higher institutions of learning. At the present time there are 181 teachers registered for professional improvement work and 130 teachers submitted evidence of work done during 1926. Since the beginning of this system, 36 teachers have completed the necessary work and are receiving the maximum salary. Many teachers continue professional study after they have reached the maximum and there are 15 teachers who, stimulated by the required work, have received degrees from higher institutions since beginning their work in Quincy.

Additional information about the schools may be found in the several special reports and the statistical matter included in Appendix A of this report.

The death of Mr. Nickerson was a serious blow to the welfare of the school system. All connected with the schools united in meeting the emergency and all have co-operated to work for the common good of the children. For the accomplishments of the year the credit should go to the entire corps of fellow workers for their splendid co-operation in a time of need.

In closing, I desire to express my appreciation of the unfailing support and help of the School Committee.

Respectfully submitted,

ALBERT H. COCHRANE,
Acting Superintendent of Schools.

APPENDIX A

SPECIAL REPORTS

1. Report of Supervisor of Grammar Grades

MR. ALBERT H. COCHRANE, *Acting Superintendent of Schools, Quincy, Mass.*

My dear Mr. Cochrane:

During the past year our teachers have very largely focused their attention upon the functioning of the objectives or problems which had been worked out the previous year. In framing these problems for the pupils, the desired goals were: to provide for the entire group, to furnish a real "drive or urge," to show, as a unit, the month's work, to teach correct habits of study, to stimulate independent work, and to give experience in evaluating.

The teacher's part in checking up on the goals was, first of all, as a working member of the group. In this capacity, she "carried on" by looking up and assembling some references for the pupils' use, by calling attention to interesting and helpful current material, by encouraging the pupils to look for and bring in such material, and by letting them evaluate their own contributions. She met the teacher requirements by being ready—after actual classroom use of the problems—to give the pupils' reactions to them.

At the end of each month during a semester, grade conferences were held. These conferences were truly the teachers' conferences, for the reason that the supervisor merely presided and for the reason that the objectives or problems had not been superimposed. At each conference a secretary "pro tem" recorded the suggestions, criticism, and recommendations made by the teachers upon their own work, and handed them to the presiding officer. With the help of these reports, committees, appointed from each grade, have revised the objectives thus far worked out. They are Geography for the fifth, History for the sixth, and Geography, History, Arithmetic, and Language for the seventh and eighth grades.

In closing, I wish not only to express to you and my co-workers, the masters and the teachers, my deep appreciation of a most hearty and helpful cooperation, but also to pay tribute to the memory of Mr. Nickerson, whose sympathetic confidence was ever an inspiration for the best service I could give.

Respectfully submitted.

HELEN MAUDE DELICKER,
Grammar Supervisor.

2. Report of Supervisor of Primary Grades

MR. ALBERT H. COCHRANE, *Acting Superintendent of Schools, Quincy, Mass.*

My dear Mr. Cochrane:

It is with pleasure that I submit my sixth annual report as supervisor of the primary grades.

Because of the necessarily restricted compass of any report of

this nature, I shall attempt, rather than merely giving in resumé the details of the year's work, to epitomize the process and results of one aspect of that work which is becoming increasingly significant under the new conditions of our modern life, namely, the development of silent reading in the schools.

When we realize that in the seven-year period from 1914 to 1921—for which authentic figures are now available—the number of books published yearly in the United States alone increased from 175,166,698 to 325,950,602 volumes, and that in 1923 there were in existence 13,077 different periodicals and newspapers, we are brought face to face with the indubitable fact that the child of this generation who is to be the cultivated man or woman of the next generation, abreast of the growth of this constantly growing world, will be required to read well and intelligently increasingly greater quantities of material. It is now obvious, as the result of careful investigations, that the old methods are becoming more and more inadequate to the demands of this new condition of things, and it therefore becomes the duty of the schools to establish and develop as early as possible, and in accordance with the best modern psychology, more effective reading habits.

The old method of oral reading, with its fixation of the attention upon the pronunciation of each single word, and its consequent inhibition of the immediate mental fusion of the words of the sentence into a single whole thought, tends to distract, at least temporarily, the attention of the reader from the most essential point of his reading,—the meaning, and thus to retard the reading process. On the basis of silent reading it is the ideas rather than the word-elements which become paramount in the pupil's mind, and thus, with the greater acceleration of the process and the increased comprehension which comes with this method, the child, as he passes to the higher grades, finds himself much more fitted to cope with the ever broadening demands of, and indeed more ably genuinely to enjoy his reading in the wider range of subjects before him. The aim, however, in our plan of primary reading, is not to supersede oral reading in the primary grades,—for that, too, has its place,—but more and more to supplement it until, let us say, in the fourth grade, silent reading becomes the dominant process.

With this end in view, three years ago we tried out in just one of our classrooms, the silent reading methods of instruction; and the next year this plan was carried over into a second class room. Silent reading equipment and readers were furnished the two teachers, and, as the year went on, other teachers from the various schools of the city were invited to observe the work there in process. This observation and a series of conferences and discussions on reading, led to a desire on the part of a growing number of teachers to undertake the same method of instruction. Today in several of our schools silent reading is being taught for the first time in the first grade, and in a number of the schools it is being carried on from the first through the fourth grades with most gratifying results.

This work in silent reading is attracting many visitors to our schools, and we have received a large number of requests from school committee members, superintendents, supervisors, principals and teachers from adjoining cities and states for permission to visit and observe our reading classes.

I cannot close my report without an expression of my deep-felt

appreciation of the splendid leadership and cooperation of the late Mr. Nickerson in his capacity as Superintendent of Schools, and of my sincere appreciation and commendation of the spirit of those on whom the development of the Quincy schools now depends.

Respectfully submitted,

ELSA SCHOSHUSEN,
Supervisor of Primary Grades.

3. Report of Supervisor of Music

MR. ALBERT H. COCHRANE, *Acting Superintendent of Schools, Quincy, Mass.*

My dear Mr. Cochrane:

It gives me pleasure to submit the following report for the music department.

The music in the schools is making a very constant and sure advance, with a perceptible improvement each year both in the quality of the work and in the response of the community. We are trying to appeal to the children through every musical channel possible: first, through vocal work, which includes the singing and reading of music in the classroom, chorus and glee club; second, through listening to music and music appreciation, embodied in listening lessons with the victrola, and in music memory contests; and third, through participation in instrumental music, accomplished by classes, orchestras and bands.

The classroom vocal work is organized and outlined carefully for the grade teachers, eliminating everything non-essential for music reading and interpretation, and with one aim in mind, namely, that the boy or girl be able to read, sing, and interpret new music at sight. In December a concert was given to the public by the glee clubs of fourteen grammar schools. Each club sang an individual number, and the combined clubs, making a chorus of four hundred and fifty, presented Coerne's "Landing of the Pilgrims." Music appreciation has been motivated this year by the annual Music Memory Contest, culminating in a concert of music memory numbers given to the children by the Boston Symphony Orchestral Club. In the instrumental work, which is carried on entirely outside of school time, there is a steady growth. Between three hundred and fifty and four hundred children of the grades V to IX enroll each year in classes offered for instruction in violin, viola, cornet, trombone, horn, flute, clarinet, saxophone, and drum. Opportunity is offered the child to buy his instrument on a part-payment plan, and to take a class lesson for twenty-five cents.

This instrumental class work is expanding the school orchestras, so that it has become necessary to have a first and second orchestra in the junior and senior high schools. The enrollment in these orchestras shows a membership of about two hundred and twenty-five. A Central Grammar School Band also has been organized, and will function as a training group in preparation for the High School Band.

In junior high schools chorus singing is required of every pupil. A course in elements of music and elementary harmony is required of all who elect the Normal Course. Orchestra, glee club and band—all elective and selective—are after school activities. In senior

high school all music is granted diploma credit except band work. The regular school-time activities are chorus, harmony and music appreciation; the after-school activities are glee club, orchestra and band. I would strongly recommend diploma credit for the latter.

The purpose of this musical training is twofold. First, to fit the child to live his life in the fullest manner possible, and to assist him in attaining the highest degree of social efficiency in so far as music enters his environment; second, to give those children who later in life select music as their vocation a broad and inspirational foundation upon which to build their life's work.

In closing, may I express my gratitude to the school officials, the school committee, the teachers and the community, for their encouragement and hearty cooperation in the music work, and I wish also at this time to commend Miss Tuthill and Mr. Taylor for their splendid assistance.

Respectfully submitted,

MAUD M. HOWES,
Supervisor of Music.

4. Report of Supervisor of Drawing

MR. ALBERT H. COCHRANE, *Acting Superintendent of Schools, Quincy, Mass.*

My dear Mr. Cochrane:

I herewith submit my report of the Drawing work in the public schools of the City of Quincy, Massachusetts.

The drawing work is continuing, as in former years, with a course of study divided into the following parts: Color, Design, Representation, and Construction. Special emphasis has been placed upon Representation, helping the child to learn how to tell stories and to describe facts through the medium of the pencil and the crayon.

As always, correlation with other school subjects has been stressed. Geography, particularly, lends itself to correlation through the representation of costumes, homes, vehicles, landscape, etc., of other lands.

Pupils going to the new North Junior High School found a well-planned and well-equipped drawing-room. They quickly showed their appreciation of their surroundings by starting their work with commendable earnestness and enthusiasm. The results of their work should be excellent, although they are handicapped by the shortness of their allotted drawing time.

In working in the schools of the city, I am impressed by the amount of native talent which many of the children possess, and regret the fact that many of these gifted boys and girls are unable to go beyond the grammar school. If an evening freehand drawing class could be established, it would prove a source of pleasure and benefit to many.

I gladly take this opportunity to express my appreciation of the fine spirit of cooperation which I find in every school, from the master and teachers down to the youngest pupil, also to my fellow supervisors, and last but not least, to the Superintendent.

Respectfully submitted,

AMY E. ADAMS.

5. Report of Supervisor of Physical Education

MR. ALBERT H. COCHRANE, *Acting Superintendent of Schools, Quincy, Mass.*

My dear Mr. Cochrane:

I herewith submit a combined report and outline of policy for the Department of Physical Education.

A. Aim of Department

To develop health and character through the medium of gymnasium classes, room gymnastics, organized recess play, inter-mural and inter-school games, demonstrations, health talks, medical examinations, etc.

B. Senior High School

1. Gymnasium classes

An effort is being made to make these classes more attractive. A real need exists for additional classes affording two periods weekly for each pupil.

An ideal arrangement would provide classes twice weekly, with each period of sufficient length to allow time for a shower bath and change of clothing.

2. Inter-group sports

A well organized system of inter-mural contests will provide opportunity for increased numbers of boys and girls to participate in some type of athletics. A start has been made with a basketball league representing home rooms whereby over one hundred boys will participate.

3. Competitive games

These are well handled at present except that too much emphasis is placed on them to the exclusion of the items mentioned in the last paragraph, i. e., inter-group contests. All competitive sport schedules should be shortened twenty-five per cent and the time thus saved used with larger groups.

C. Junior High School

1. Gymnasium classes

Bi-weekly classes whenever possible will increase the interest and efficiency in this department. There is a similar need as in Senior High School for a longer gymnasium period to enable pupils to secure a shower bath and change of clothing.

2. Inter-class and intra-class sports

Such competition as is now in progress in these forms of athletics is always helpful in bringing large numbers of pupils into action.

3. Inter-school competition

This should be limited at present and when the new Junior High Schools are completed should be confined to that group.

D. Grade schools

1. Room gymnastics

Well organized at present with a time allowance of ten minutes daily. The big objectives are good posture, mental alertness, and a general increase in blood circulation.

2. Organized recess

Another well organized feature. A wider range of games will be taught during this year. These games are to be graded according to the several ages of the pupils.

3. Inter-school contests

The leagues now existing in soccer and baseball are helping to teach sportsmanship and fair play and should be continued until the Junior High Schools are ready.

4. Leaders' group

Pupil leaders are selected and given special training. These leaders assist in class room gymnastics, allowing the teacher to give her attention to corrective work. These groups are now in operation in the seventh and eighth grades.

E. Special features

1. Medical examinations

All pupils entering gymnasium class work and competitive sports have this examination, which covers heart, lungs and hernia. These examinations are being given this year with Dr. Drew and Dr. Smith in charge.

2. Demonstrations

A closing day exhibit was given featuring a demonstration of physical training activities. This was preceded by several smaller demonstrations during the indoor season.

F. Expansion

With the expansion of the Physical Education Department as the Junior High work grows should come readjustments at both Senior High and Central Junior High. Various new problems will arise and new policies will have to be outlined.

In closing I will say that these suggestions are all worthy of our best time and thought and will result in a more comprehensive plan of physical education than we have at the present time.

Respectfully submitted,

W. H. WHITING,
Supervisor of Physical Education.

APPENDIX B

STATISTICAL DATA

1. Report of the Attendance Officer

MR. ALBERT H. COCHRANE, *Acting Superintendent of Schools, Quincy, Mass.*

I hereby submit the thirtieth annual report for the twelve months ending December 31, 1926.

Number of cases investigated for non-attendance as per
 blanks 1,721
 Number found to be truants 101
 Number of transfer cards investigated..... 930

Details regarding attendance work and employment certificates for year ending December 31, 1926, appear in the following tables:

Attendance Work by Months

1926	Number of cases in- vestigated	Actual truants	Children of school age returned to school from street	Manufac- tories and stores inspected	Number found empl'd contrary to law
January	168	10	2	2	1
February	142	11	1

APPENDIX C

LISTS OF GRADUATES

1. High School

(a). JANUARY, 1926

Clifton Ahlstrom	Mildred Claire Lewis
Ralph Bartholomew Allen	William Gustaf Lindholm
Robert Edwin Anderson	Charles Everett Lister
Elmon Balentine	Mildred Corinne Lundgren
Roger Charles Bascom	George McCarron
Helen Louise Bates	Harold Vincent McCarthy
Earl R. Beeman	Mary Gertrude McDonald
Joseph Biller	Gladys MacKay
Johnston Bird	Robert Campbell MacLean
Frederick Harvey Black	John Everett MacLennan
Charles Harvey Brooks	Marion Bosworth McMillen
Isabelle May Burke	Daniel Joseph McNiece
Edith M. Cairnie	Gladys Irene Malia
John Herbert Card	Irene Elizabeth Manning
Corinne Gunborg Cedarstrom	Robert Burns Manning
Nancy Coffman	Libero Marini
Nino Coletti	Genevieve Rita Monahan
Theodore Lane Com Moss, Jr.	Jean Nourse Morrison
John Norris Crossman	Arvo A. Nelson
Mary Cecelia Crowley	Doris Florentine Nelson
Geraldine Louise Curran	Ruth Norma O. Nelson
Isaac Cutler	Edward Nelson O'Hearn
Alice Catherine Daggett	Hazel Cecelia Olsen
Rodney MacLean Darling	Effie Margaret Palmer
John Emil Djerf	Beatrice Augusta Palmquist
Eleanor Isabelle Duley	Mary Christine Papile
George Timothy Felix	Albert Warren Parker
Arthur Thomas Felix	Laurence W. Parrish
Cesidio Gallo	Gertrude Lillian Peterson
Stanley Walter Gaudet	Walter Frederic Peterson
John Harris Golbranson	Ethel Margaret Pierce
Eva Lillian Goldner	Rachel Hilda Elizabeth Pyyny
Raymond O. Granai	Virginia Holbrook Read
Helen Clare Griffin	Eleanor Marie Reddy

*These boys have completed their time at this school, but the state requires that they have six months' experience at the trade before they receive their diplomas.

These certificates are exchanged for diplomas whenever the trade period is completed.

APPENDIX D.

SCHOOL STAFF AND TEACHERS' ORGANIZATIONS

1. Organization of Staff, December, 1926

Black face signifies attended without graduation
Attendance for less than one year at an institution is not noted

ALBERT H. COCHRANE, Acting Superintendent, Harvard;
elected 1925

Senior High School—Coddington Street
